Location: R 15/S B; R 2/S A & B; R 3/S B (OS 136 and other oversize)

Completed by: E. Heidi Yeager, November 29, 1990; addition by Andrew C. Newby, March 16, 1994; revised and updated by Tamara Jones, April 30, 2014

Biographical Sketch

Wilhelm J.H. Eitel was born 6 May 1891 in Frankfurt am Main, Germany. He graduated from Woehler Realgymnasium, Frankfurt am Main in 1909. In 1912, he received his doctoral degree from the University of Tübingen and the University of Heidelberg, Germany (Dr. Phil.Nat.).

During World War I, Dr. Eitel was a flyer for the German armed forces. He has been credited as one of the first men to introduce aerial photography for combat intelligence.

Between 1926 and 1945, Dr. Eitel was the founder and director of the Kaiser Wilhelm Institute for Silicate Research, Berlin-Dahlem. After World War II, in 1945, the Russian government "offered" Dr. Eitel a position in the Soviet Union. He refused the offer, so he was forced to flee Germany. The United States secret service agents smuggled Dr. Eitel safely out of Germany as part of Project Paperclip. This was a post war organization of scientific consultants whose task was to bring German scientists to the United States.

Upon arrival in the United States, Dr. Eitel was employed as consultant and research scientist for the office of Naval Research for The Department of the Navy, located in Norris, Tennessee, from 1946. He remained with the Naval Department until 1952 when, upon request from The University of Toledo, he established and became director of The Institute for Silicate Research at The University of Toledo. The Institute was formed to do basic and graduate research in the fields of glass, refractories, ceramics, hydraulic binders and mineral synthesis. In 1956, Corning Glass Works, Inc. gave a major grant to the Institute. Eitel remained the director until his retirement in 1961. Professor Eitel remained deeply involved in his silicate research at the University. He became a consultant for major businesses in the Toledo Area, such as Owens-Illinois Company. In 1976, Dr. Eitel completed his eighth volume of his book Silicate Science.

Dr. Eitel's additional professional experience was extensive. He was research Fellow at the Physical Society and Mineralogical Institute of the University of Frankfurt am Main (1912-1919); Privatdozent at the University of Frankfurt am Main (1919-1920); A. Ord. Professor of the PhysicoChemical Mineralogy, University of Leipzig (1920-21); Ord. Professor of Mineralogy and Petrography at the University of Königsberg, East Prussia (1921-1926); and Ord. Professor at Technische Hochschule, Berlin-Charlottenburg (1926-1945).

Dr. Eitel was a world renowned scientist, who was a past elected member to many scientific societies. Some of those societies included: the Academie des Sciences de Roumanie, Roumania; the American Ceramic Society (Fellow), the American Chemical Society, the American Mineralogical Society (Fellow); the Deutsche Mineralogische Gesellschaft, the Kaiser-Wilhelm Gesellschaft zur Förderung der Wissenschaften, the Königsberger Gelehrte Gesellschaft, the Preussische Akademie der Wissenschaften-Berlin; the Faraday Society, England; Instituto Lombardo di Scienze e Lettere, Italy; Phi Kappa Phi; the Society of Glass Technology (Fellow), England; and the Sub-Committee for Special Cements, International Commission for Large Dams (1935-1939), Paris. He was also an associate member of various engineering and research organizations.

During his sixty-year academic career, Dr. Eitel was awarded many honors. In 1962, he was awarded an honorary doctorate degree of Natural Science from the Ruprecht-Karl Universität, Heidelberg. In 1966, he was honored for his outstanding work in silicate

**Wilhelm J.H. Eitel
Papers, 1890-1978**

research by the Free University of Berlin. In 1970, he received an honorary law degree from the University of Toledo. In 1978, he was awarded the George Agricola Medaille by the Deutsche Mineralogische Gesellschaft. The American Chemical Society, Toledo Section, recognized him for his outstanding service in chemical abstracting.

Dr. Eitel was invited to be a guest lecturer at the University of Bologna, Italy and at Aachen University, Germany. He also published countless articles and books in several different languages, being proficient in twelve. He was also an accomplished pianist, finding four hours a day to practice the classical repertoire.

Dr. Eitel married Annemarie Engeli on 28 February 1924 in Königsberg, Prussia. She died on 6 April 1945. On 27 November 1946, Eitel married Annemarie's sister, Antonia. Dr. Eitel had five children: Dr. Luise Fanny Peake, Franz-Albrecht, Johann-Michael, Mrs. Eleonore Hansen, and Dr. Dorothea Hover. Antonia Eitel died in 1978. Dr. Wilhelm J.H. Eitel died soon afterward, on 20 July 1979, at the age of 88.

Scope and Content Note

This collection contains correspondence, glass-plate negatives, manuscript drafts of the eight-volume *Silicate Science*, patents, abstracts, and miscellaneous items relating to Dr. Wilhelm J.H. Eitel, founder and director of the Institute for Silicate Research – later renamed the Eitel Institute for Silicate Research – from 1952-1961. The collection is arranged in seven series as follows: Series I. Publishing Company Correspondence; Series II. Professional Associations; Series III. University of Toledo; Series IV. Government Agencies; Series V. Personal and Professional Correspondence; Series VI. Research Activities; and Series VII. Miscellaneous. The personal and professional correspondence is arranged first chronologically and then alphabetically. All other series are arranged alphabetically.

The correspondence consists largely of personal letters to colleagues throughout the world, although official business is included. Of particular note in the collection is the patent debate Dr. Eitel was involved in with the Perlite Company between 1955 and 1959 over the use of the term "perlite" in his *Silicate Science* book (Box 2, Folder 24). Also of note is the correspondence pertaining to the Highway Research Board, and Eitel as director from 1955-1972 (Box 4, Folders 11-19); the Esso Research Labs correspondence for which Eitel was a consultant from 1954 to 1974 (Box 8, Folders 1-9); U.S. Department of the Interior-Geological Surveys from 1971-1975 (Box 12, Folders 22-26); miscellaneous German Geological survey maps (Box 13, Folders 1-5); master manuscript copies of *Silicate Science* (Box 18, Folders 19-20); reports on the "Owens-Illinois Spectraglass Production Method" by Eitel (Box 21, Folder 5); printing blocks stamped with diagrams used for *Silicate Science* (Box 24); and glass-plate negatives for Eitel's various works (Box 27, A,B,C).
