Methodology

This chart is based upon PayScale Salary Survey data for full-time employees in the United States who possess a Bachelor's degree and no higher degrees and have majored in the subjects listed above. These results may not represent all graduates with these degrees. All colleges and universities across the nation were included. As a result, median salary figures may be skewed toward large state universities, since these schools have the largest attendance. Salary is the sum of compensation from base salary, bonuses, profit sharing, commissions, and overtime, if applicable. Salary does not include equity (stock) compensation. See [full methodology](#) for more.
