

SUPPLY CHAIN MANAGEMENT

College of Business
Administration

Bachelor of Business
Administration
4-year program

sound like you?

**Buy materials and
supplies for a com-
pany • Manage
inventory • Plan the
process of production**

did you know?

Companies such as Wal-Mart, Coca-Cola, and Nike attribute a great deal of their success to the efficient management of their global supply chains.

Supply Chain Management at UT

Supply chain managers coordinate the acquirement, manufacturing and distribution of goods and services to customers. Students will develop skills in purchasing, operations and logistics while gaining an appreciation and understanding of how decisions made in one area can affect activities in other areas and customer satisfaction.

UT is one of few universities that offer a supply chain management major. The management department works with information systems, operations, marketing, sales and international business to give students a wide range of knowledge. Students will develop communication, conceptual and analytical skills through projects and course work. In addition, UT students can take advantage of state-of-the-art computer software and computer simulations.

Students can gain real-world experience through numerous internship opportunities that often lead to full-time positions. This lets students work with accomplished professionals in the supply chain management field while earning college credit and money.

What to expect when you graduate

More and more businesses are using outsourcing and restructuring everyday, creating a need for well-trained individuals with cross-functional skills in supply chain management. Graduates can take advantage of this by becoming buyers, materials analysts, process planners, load planners and inventory managers.
