

COMPUTER NETWORK ADMINISTRATION

UNIVERSITY COLLEGE ■ ASSOCIATE DEGREE PROGRAM

Work for a computer consulting company ■ Be a certified network engineer ■ Network computers in a variety of workplace environments

sound like you?

Computer Network Administration at UT

Computer network administration prepares students for work in the computer networking industry. Students learn about operating systems management, programming, networking fundamentals and computer integration. The coursework prepares students for professional certifications like A+, Novell Certified Network Administrator, Linux+ and Microsoft Certified System Engineer. The associate degree offers students the fastest track to a successful career.

UT's computer network administration program deals with the ability to share information and equipment. As more companies install networking capabilities, more computer networking profes-

sionals will be needed to implement and manage these networks. Students work with current technology and equipment typical of that used by most employers in a hands-on environment.

What to expect when you graduate

Students are prepared for network administration and network engineering certification, which is recognized as the global standard for administering, servicing and supporting networking and networking applications. Typical job opportunities include working for corporate information systems departments, computer consulting companies and computer software/hardware organizations. The job market for computer networking professionals has been solid and will continue to grow.

Computer network administrators continue to have the highest incomes among all technical professionals.
