Puff the Magic Dragon: New Realities in the Workplace with Medical Marijuana

The increase in availability and the normalization of medical marijuana has raised a number of issues in the workplace. Attend this presentation by Shumaker, Loop & Kendrick's labor and employment partner Mechelle Zarou and employee benefits attorney Wyatt Holliday to learn about the potential issues, evolving applicable law, and current best practices in addressing medical marijuana in employee ranks.

Issues to be discussed include:

- Employee policies
- Pre-hire testing and offers of employment
- Interaction with the Americans with Disabilities Act of 1990
- Difficulties in highly regulated and technical industries
- Coverage issues under your group health plan
- Reimbursement issues with health reimbursement accounts

Come prepared to join the conversation and learn the ins and outs of medical marijuana and the workplace.

The event is free for UT Family Business Center members and sponsors.
