

Windows Live Movie Maker Compression

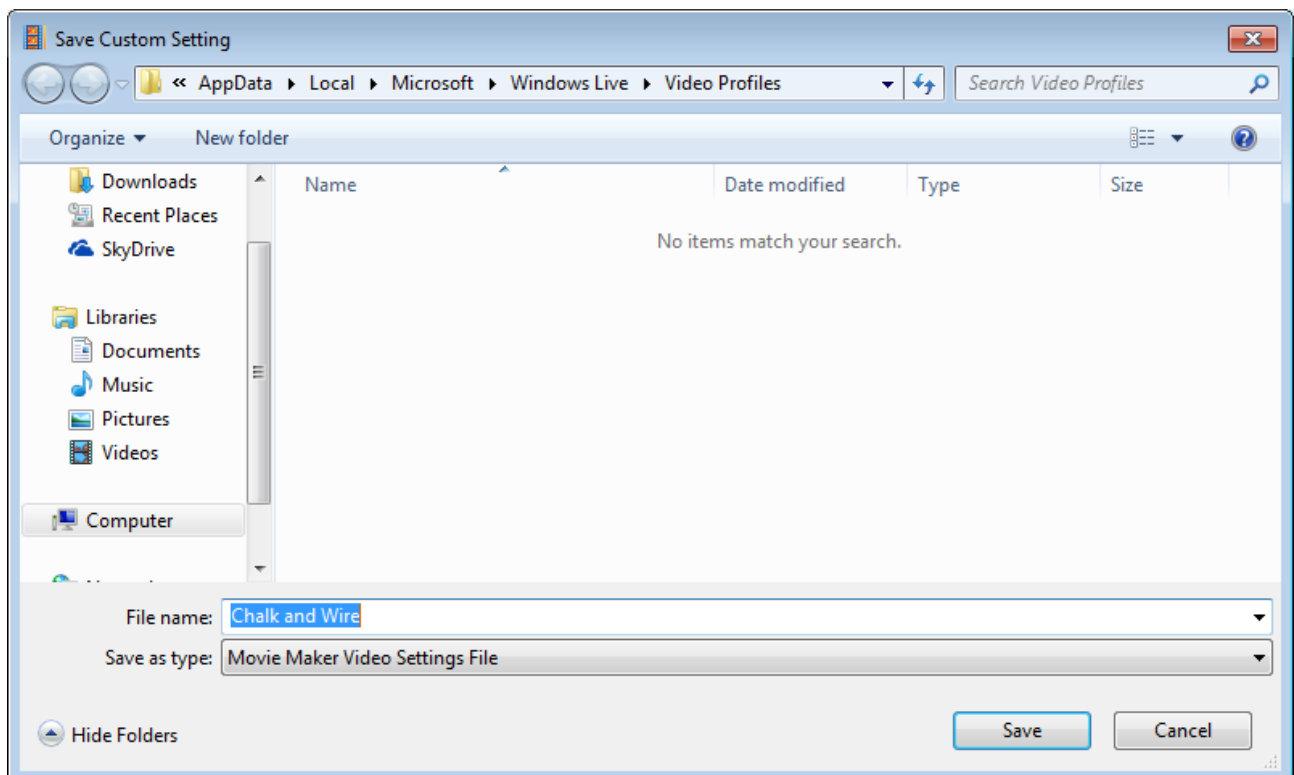

1. On the Windows Movie Maker Live taskbar, click on the Save movie button.
2. Select the Create Custom setting... link at the bottom of the list.

3. Use the settings in the figure below. These settings are based on a 20 minute video clip.

4. Click Save and name your settings Chalk and Wire and save the custom setting in the Video Profiles folder.

5. In the Save Movie list, you should see Chalk and Wire. Select that option and save your compressed video file.
