Standard Operating Procedure

Eye protection and other protective clothing must be worn when operating power tools.

Purpose

To prevent serious injuries resulting from accidents and misuse of power tools.

Procedure

1. Before starting up equipment, place over eyes:
   A. Protective eye goggles or
   B. Protective eye shield or
   C. Wear safety glasses.

2. Check for loose clothing or other protective equipment that may snag or get caught in the equipment and secure.

3. Spark aprons should be worn where sparks are created due to grinding, etc.
