Comments/Notes:

This Revision is actually an addition. The current in class section will continue as described above. We are duplicating the entire HDS program for the online section. All content, credit hours, and degree are exactly the same. All HDS core courses will be offered each semester for the online section only due to the fact that the online students will mostly be attending in a part time capacity. The in class section will continue to be offered full time.

The Full Program name is MSBS in Human Donation Science, Professional Science Master

We will have two tracks (or sections) the in class or face to face track and the on-line track.

Rationale:

This is an attempt to increase enrollment through the on-line opportunity and is a response to the Organ Donation and Transplantation industry. There is a demand from within the industry for individuals already working in the field who desire to earn the MSBS for promotion opportunities and personal achievement.
