Reason for change

The course has always had 3 contact hours. The change will regularize student plans of study and more honestly acknowledge workload. Nobody seems to remember exactly why it had seemed necessary to list it previously as 2 credit hours.

Has course content changed? No Yes If so, give a brief topical outline of the revised course below

Has the course changed from a non-core curriculum course to a core curriculum course? No Yes If so, explain how this course fulfills the core curriculum/general education guidelines.

Addendum to Course Modification Proposal for MATH 6610/8610

This course has 3 contact hours but currently counts only for two credits. It is proposed to make it count for three credits. The course focuses on preparing students for real world challenges. It aims at integrating and applying the knowledge students acquire in the graduate statistics curriculum such as linear models, generalized linear models and multivariate data analysis. It emphasizes professional standards, interpersonal skills necessary for effective statistical consulting, in particular the essentials for effective communication with clients such as oral presentation, interpretation of statistical analysis and writing up of reports.

Subject: Addenda to course modification proposals for MATH 5600/7600
MATH 5610/7610, MATH 6600/8600, MATH 6610/8610

Recently DMS has submitted proposals to modify the listed courses from 2 credit hours to 3 credit hours. Since the 5000-level classes are cross-listed with 4000-level classes, then NSM council asked for additional information to make explicit the extra requirements for graduate credit in those classes. The recent instructors of these classes Drs. Qin Shao and Rong Liu have provided detailed descriptions of the extra requirements below.

For completeness they have also included additional information about the 6000-level classes, although this was not requested.
