

**National Conference on Undergraduate Research (NCUR)
University of Memphis
Memphis, Tennessee, April 06-08, 2017**

All University of Toledo undergraduate students involved in research or creative projects are strongly encouraged to submit an abstract (of approximately 250-300 words) describing their research project or creative activity in order to attend the 31st annual National Conference on Undergraduate Research hosted by the University of Memphis. Every year over 3,000 undergraduate students from colleges and universities around the country attend this conference to present and share their research efforts to a national audience. Interested students are required to submit their proposals for an internal review before sending it on to the conference - these proposals are due Friday, October 28th at the main office of the Honors College in MacKinnon Hall, Room 2000. Students in all majors and disciplines are eligible to apply, and if accepted to attend the conference, financial assistance may be available to help pay for conference expenses (the registration fee, travel, and lodging). Acceptance to NCUR is competitive, but in the past UT students have had a very high acceptance rate. Student presentations can be with a poster or with a 15 minute oral presentation. Students attending the conference will miss classes from Wednesday (4/5) through Friday (4/7) during this week in April.

- October 1st - Pick up the NCUR internal application form at the Honors College Office in MacKinnon Hall, or download the application from the Office of Undergraduate Research website.
- It is important that all students interested in attending NCUR must fill out our internal application form. This will help us keep track of the number of UT students applying so that transportation and lodging can be arranged.
- Return completed application with abstract by Friday, Oct. 28th.
- Wednesday, Dec. 2nd 11:59pm– Deadline for submitting abstract to NCUR.

For more information, contact Dr. Larry Connin at larry.connin@utoledo.edu
