Procedure for setting up PEAP (Wireless) on a Windows Vista machine at the University of Toledo
1. Click on the **START** menu and open the **Control Panel**.

2. Click the link under **Network and Internet** called **View network status and tasks**
3. Click on the **Manage Network Connection** located on the left side of the window box.

4. Right click on the **Wireless Network Connection** and select **Connect/Disconnect**
5. Right Click on **Private** and select **Properties**.

6. Make sure the **Security type** is set for **802.1X** and the **Encryption type** is set for **WEP**.
7. Click on the **Settings** button next to PEAP

8. Check “Connect to these servers:” and add “IAS00.utad.utoledo.edu;IAS01.utad.utoledo.edu” to the box and check any Verisign Certificate Authorities.
9. Click on the **Configure** button next to EAP-MSCHAP v2

10. Uncheck the box *(Automatically use my Windows logon name and password)*

11. Click OK
12. Click OK again
13. Click OK
14. Make Sure **Private** is still highlighted and click the **Connect** button.

15. Click on **Enter/select additional log on information**
16. Another box will show up asking for a User name, password, and Domain.

![Image of Enter Credentials window]

17. Type in your UTAD User ID, your UTAD password, and UTAD for Logon Domain.

18. Click OK

19. It will connect you to the UT wireless Network using PEAP.

20. If this doesn’t happen then a box will pop up at the bottom right hand corner (See below)

![Image of Additional information message]

21. Click on it and another box will show up asking for a User name, password, and Domain.

![Image of Enter Credentials window]

22. Type in your UTAD User ID, your UTAD password, and UTAD for Logon Domain.

23. Click OK

24. It will connect you to the UT wireless Network using PEAP.
