Access Rights (Role):

Group	Description
_____ Project Managers	Users have most global and category-level project permissions and limited resource permissions. This group is intended for users who maintain project schedules on a daily basis.
_____ Resource Managers	Users have most global and category-level resource permissions. This group is intended for users who manage and assign resources and edit resource data.
_____ Team Leads	Users have limited permissions around task creation and status reports. This group is intended for people in a lead capacity who do not have regular assignments on a project.
_____ Team Members	Users have general permissions for using Project Web App, but limited project-level permissions. This group is intended to give everyone basic access to Project Web App. All new users are added to the Team Members group automatically.
