

American Ethnicity Library Resource Guide

Finding Books

You can find books in the [UT library catalog](#) (or the OhioLINK Central Catalog) using keywords for your topics or a subject headings search. More help is available from the [UT Library Guide](#). Suggested keywords or subject headings include: **Multiculturalism-United States** **Assimilation** **Minorities**
National characteristics, American **Ethnic relations** **Immigration**
Acculturation **Identity** **Diversity**
Or use specific ethnic groups, such as: African Americans, Asian Americans, Hispanic Americans, etc.

Ethnic Identity is a broad topic and its interdisciplinary nature means that relevant materials are found throughout the collection. A book's location depends upon its subject matter. Materials discussing specific ethnic or racial groups will have subdivided subject headings, as for example, "Jews – United States – Identity" "Mexican American Youth – Ethnic Identity". More specific subject headings describe the concept of biracial/multiracial as well as relations between different ethnic or racial groups or among different multiracial/biracial groups, as for example, "children of interracial marriage", "interracial adoption", "mestizos", "miscegenation", "racially mixed people", "Métis".

Finding Articles

In general, searching the databases for multicultural or ethnic information is somewhat complex due to language bias and social values. Your most efficient method is to use keywords and avoid subject searches. Begin your search for current information with an OhioLINK Research database: [SocINDEX](#) or [Academic Search Complete](#). If you are looking for a cultural perspective, [MLA International Bibliography](#) is your best choice. If you want a political focus, try [International Political Science Abstracts](#). To expand your search, search for Canadian or Latin American topics or try a subject search, use [Historical Abstracts](#) or [America: History and Life](#). [Humanities International Complete](#) or [Social Work Abstracts](#) will also provide a different focus for your research.
