

## Research Project Worksheet

Name the problem you have selected as your research project.

Describe the problem in detail. Explain this issue or situation as a problem in need of solution, the scope of the problem, its impact in the world and the importance of this problem that makes you interested and willing to spend time learning and writing about it.

List all the sources that you consulted to learn about the problem.  
Also list the bibliographic information about those sources.

1.

2.

3.

4.

Give a summary of the history of this problem. When did it become a problem? How did it become a problem?

List all the sources that you consulted to learn the history of the problem. Also list all the bibliographic information about those sources.

1.

2.

3.

4.

Discuss solutions or attempts at a solution for this problem that already exist in the world.

List all the sources that you consulted to learn about solutions for or attempts to solve the problem.

Also list all the bibliographic information about those sources.

1.

2.

3.

4.

Explain your solution to the problem you have chosen to investigate. Give details about cost and implementation of this solution. Explain how you formulated this answer or solution and how it is suitable as the remedy to the problem you have addressed in your research project.

List all the sources that you consulted to find a solution of the problem you chose to investigate.

Also list all the bibliographic information about those sources.
