

FINDING VIDEOS/DVDs IN THE LIBRARY

The Mulford Library has a small number of videos and DVDs in its collection. Those that circulate for three weeks are located on the fifth floor of the library, and those that circulate for one week are located in the reserve collection at the Service Desk.

Videos are also available through the OhioLINK Digital Video Collection (<http://dmc.ohiolink.edu/media/ffhLogin>). You can browse by topic or search by keyword. Videos are available for viewing and downloading (for temporary storage only). Real Player software is required to view videos (<http://www.real.com>).

Using the Online Catalog to Identify Videos/DVDs

There are several ways to search for videos/DVDs in the catalog:

- Title** Do a title search if the exact title of the item is known.
- Subject** From the catalog's main search page, choose **Medical Subject**. Search for your subject and limit results to **Material Type: Audiovisual**.
- Word** A word search allows for searching in titles, notes, subjects, and other fields. Search for a video on a topic and limit results to **Material Type: Audiovisual**.

If the video or DVD needed is on reserve, bring the call number to the Service Desk. Library staff will get the item and check it out for you.

If assistance is needed, ask at the Service Desk. From home or office, contact Reference Assistance at (419) 383-4218, MulfordReference@utoledo.edu, or <http://hsc.utoledo.edu/lib/resources.html>. Chat reference is available on the Library's web page: click on the **Ask a Librarian** link.
