Policy

Residents Responsibilities in Neurology Rotation.

Purpose

a. To provide residents with a sound academic and clinical education in Neurology.
b. To provide residents with the basic requirements they need in neurology to pass their ABIM Exam.
c. The resident during neurology rotation needs to be integrated in the team and take ownership of his/her work.
d. Participate actively in the educational sessions especially those designed for medical students.
e. Each Resident should have 3 weeks of out-patient exposure and 1 week of the in-patient neurology exposure.

Procedure

Responsibilities of the IM resident in Neurology Rotation:

a. Every Wednesday morning and Thursday from noon-1:00pm, IM residents will be excused from Neurology during that time, but will be required to attend the following:

b. Morning Report - Mondays, 7:30-8:30am, RHC-1652.

c. Student Lectures - 6 one hour lectures each month, days and times vary. The student lecture schedule, CD and handbook must be picked up prior to their start date.

d. Emergency Lectures - Tuesday, 7:30-8:30am, RHC 1652, pertains only to August rotator.

e. Neuropath CPCs - Held monthly on third Wednesday during academic year (Sept-May), 5:15 to 6:15PM
Clinical Neurology Lectures - Resident lectures, held Tuesdays 7:30-8:30am.

Program Responsibilities:

a. The program will monitor the compliance of the residents.

b. If non-compliance with the rotation policy corrective action will be taken which will include placing a violation of professionalism letter in the respective files.

c. If an exception occurs, the program will address the deficiency and form a corrective plan of action to address the deficiency.
