Pre-screened human samples being sorted for HLA-DR+CD15- cells

Sorting Human Memory B-cells

Honing in on certain B cell populations

While monitoring class switching

IG 1

Propidium Iodide Staining

Measuring Cell Death with 7-AAD and AnnexinV

G0/G1

S phase

G2/M

Dead Cells

Late apoptotic/Dead cells

Early apoptotic cells

Cells were stained with PI and analyzed for cell cycle distribution on the FACSCalibur at the HSC Flow Core
Measuring C3 Complement on Burkholderia

Measuring a multitude of cytokines by flow cytometry

Measuring DsRed and CD45 expression in Transgenic Mice
