

UTMC

HYPERTENSION STUDY

RESEARCH VOLUNTEERS WITH AND WITHOUT
HIGH BLOOD PRESSURE NEEDED

STUDY DETAILS

Researchers at The University of Toledo Center for Hypertension and Personalized Medicine

(http://www.utoledo.edu/med/depts/physpharm/hypertension_center/) are conducting an IRB approved non-invasive study about the role of bacteria in high blood pressure. If you would like to learn more information about how you can get involved in this exciting process of scientific discovery, please contact one of the research assistants at:
