

Title of Clerkship: Addiction Psychiatry Acting Internship

Elective Year(s): Fourth Year

Department: Psychiatry

Type of Elective: Clinical X Non-Clinical/Research Basic Science

Clerkship Site: UTMC - 6D - Detox Unit

Course Number: PSCH 716

Blocks Available: Must check availability with Clerkship Coordinator prior to enrolling in the course.

Number of Students/
Block: One maximum

Faculty: Tanvir Singh M.D., Rakesh Goyal M.D.

Elective Description/
Requirements: The student participating in this clinical elective will be working primarily at UTMC on the inpatient Detox Unit. The student will be responsible for completion of initial evaluation of individuals with addiction who are admitted to this hospital. This will be done with supervision from Tanvir Singh M.D and Rakesh Goyal M.D. These physicians will supervise the student in all aspects of clinical management following admission. The student will assist in clinical team preparation for multidisciplinary care meetings and planning post-discharge care. In addition to learning about the clinical aspects of psychiatric management, the student will gain an understanding of various systems of care and necessity for cross-system collaboration. It is expected that the student will take significant responsibility for the daily responsibility of individuals assigned to him/her, under supervision and close collaboration with other members of the multi-disciplinary team will be expected. The student will also be expected to prepare a paper/presentation based on a topic agreed upon with the attending by the end of the term.

Length of Clerkship: Four Weeks
