

**Title of Clerkship:** **Emergency Medicine Acting Internship - UTMC (4 week)**  
**Elective Type:** Acting Internship  
**Department:** Emergency Medicine  
**Clerkship Site:** The University of Toledo Medical Center  
**Type of Elective:** Clinical X Non-Clinical/Research Basic Science  
**Course Number:** ERMD715  
**Blocks available:** All  
**Number of students per block:** 2  
**Faculty:** Emergency Medicine Attending and Resident Staff  
**Elective Description/ Requirements:** The student will become a part of the emergency team whose members handle all phases of emergency patient management ranging from triage to final disposition. The student will have the opportunity to examine patients and discuss his/her findings with the Emergency Medicine Attendings and Residents.

Students will conduct follow-up communications with select patients to assess short-term response to therapy and to ensure follow-up instructions are being followed and to assist with any problems under guidance of ED faculty and staff. Students will attend weekly simulation sessions at IISC to partake in patient care scenarios in an interdisciplinary system as well as to hone old skills and develop new ones.

Students will attend Faculty Rounds in the ED whereupon they will examine and discuss patients one-on-one with a faculty member in addition to learning new technical skills. Students will complete one ride along shift with EMS personnel to experience patient triage and treatment in the field prior to arrival to the ED.

**Each acting intern must complete two on-line modules to prepare the acting intern for his/her role as teachers of junior medical students.**

**Length of Clerkship:** 4 weeks  
**Links to EPOs** **Educational Course Objectives:** At the end of the rotation the student will be able to:

- |                                    |   |
|------------------------------------|---|
| S1, S3, S4, S5<br>S7, S10, S11, K5 | 1. Demonstrate and write an accurate history and physical examination   |
| S1, S2, P2, P7                     | 2. Interpret test data, including laboratory, EKG, and radiographic/imaging studies                                       |
