

Assistant/Associate/Full Professor in Environmental Sciences (tenured or tenure-track)

The Department of Environmental Sciences in the College of Natural Sciences and Mathematics at The University of Toledo invites applications for a tenured or tenure-track faculty position in environmental sciences with a focus on the land-lake interface within the Laurentian Great Lakes to commence August 2015. The successful candidate will develop a high quality, externally-funded research program with a broad emphasis on coupled human-natural systems and environmental sustainability. We seek a new colleague with a strong commitment to collaborative research across disciplines. The successful candidate must be a dedicated educator and would be expected to teach at the undergraduate and graduate levels in his/her specialty, and mentor graduate students.

The Department (<http://www.utoledo.edu/nsm/envsciences/>) has 18 research-active faculty with \$2-3 million in external research support annually, 40 graduate students (M.S. and Ph.D.), 150 undergraduate majors, newly renovated research facilities and research centers, including the Lake Erie Center, Plant Science Research Center and Stranahan Arboretum. The University of Toledo is located at the interface of urban regions, the biodiversity of the globally rare Oak Openings ecosystem, the agriculturally-dominated Maumee River watershed, and economically-important and ecologically-productive Lake Erie. This provides an excellent setting to support a program of integrated research on environmental sustainability.

Applicants must possess a Ph.D. in ecology, geology, environmental sciences or a closely-related discipline. Applications need to be submitted via <https://jobs.utoledo.edu> and must include a cover letter, names and contact information for three references, current CV, and brief statements of research and teaching interests. Inquiries may be sent to jonathan.bossenbroek@utoledo.edu. The committee will request letters of recommendation for finalists. Review of applications will begin on December 1, 2014 and will continue until the position is filled.

The University of Toledo is an Equal Access, Equal Opportunity, Affirmative Action Employer and Educator and is committed to increasing the diversity of its faculty. The Department of Environmental Sciences is committed to supporting work-life balance to promote productivity and creativity among our faculty. Women and minorities are encouraged to apply.
