

The Mentoring Collaborative Program Challenge: Reverse Engineering

- Each mentee will identify where they wish to be and what they wish to be doing ten years from the day they obtain their undergraduate degree.
- Mentors will then assist their mentee in creating a plan of action to walk a path to achieve that goal; identify stumbling blocks and discuss potential resolutions.
- Each mentors will help their mentee in developing realistic plans to reach that goal and reverse engineer the process all the way back to today (November 01, 2007) so the mentee can see what they need to do to accomplish their goal.
- This completed plan is submitted to the program facilitators by November 01, 2008.

Forward this initial submission to the program facilitator by January 01, 2009:

Mentee: _____

Mentor: _____

Ten year goal: _____

Plan of action:

Please submit a plan of action to the Program Facilitator in the form of an essay (minimum 250 words) by the end of spring semester 2009.

Submission Date: _____
