OK, so what does that mean exactly?
First, it’s part of The University of Toledo mission.
And second, it’s something that’s on your mind, since you are interested in health care.
So combine the two — UT’s mission and your educational goals — and you get an exciting place to live and learn at UT: The Health Professions Living Learning Community.

For more information, contact the Office of Residence Life at reslife@utnet.utoledo.edu or 419-530-2941.
The Basics of the HPLLC

It’s for first-year UT students enrolled in the following programs in:
- Athletic training
- Cardiovascular sciences
- Community health
- Exercise Science
- Health care administration
- Health information management
- Nursing
- Pharmacy
- Pharmaceutical sciences
- Pre-dental/pre-medical/pre-veterinary
- Pre-physical therapy
- Recreational therapy
- Respiratory care
- Speech language pathology

The HPLLC is located in Carter Hall East
- 240-bed residence hall with the largest bedrooms for 2 people on campus
- Carter Hall POD (Provisions on Demand) Convenience store inside the building
- Closest hall to the Rec Center

Carter Hall pictured at right.

HPLLC programs and activities will focus on developing the team skills you’ll need as a health care professional, providing tutoring and academic support, and putting you in touch with those already working in the field.

To be a part of the HPLLC, you need to be an admitted UT student and check the HPLLC option on your housing application (you can find the housing application once you log in at myut.utoledo.edu). Space is limited, so apply early after your admission.

Program fee is just $50 a semester.
HPLLC Events

Besides hanging with a bunch of other cool future doctors, nurses, pharmacists, therapists, and other health care professionals, what else could you expect at the HPLLC?

Meet and Greets — Talk to someone who’s already working in your future career field and gain insights in addition to what you learn in classes.

Reach out — Volunteer in the community or plan an event for the Toledo area with the rest of the HPLLC crew.

Get help — Biology, chemistry and math are the courses you’ll need to earn your degree, and they’re also some of the most challenging. Tutors will help you excel in your courses, and they’ll come to your hall.

Connect with someone who’s been there, done that — Get paired with an upper-level UT student in your major who will be there for you with support and encouragement (or caffeine during exam week).

Get FYI-ed — Take a special orientation course for HPLLC residents and participate in forums with campus groups that focus on health career options.
