<input type="checkbox"/>	Major revision of existing policy	<input type="checkbox"/>	Reaffirmation of existing policy

POLICY

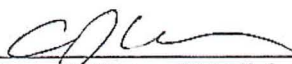

Residency and Fellowship programs sponsored by The University of Toledo must design clinical assignments to optimize transitions in patient care, including their safety, frequency, and structure.

PURPOSE

Transitions of care are critical elements in patient safety and must be organized such that complete and accurate clinical information on all involved patients is transmitted between the outgoing and incoming teams/individuals responsible for that specific patient or group of patients.

PROCEDURE

1. Sponsoring institutions and programs must ensure and monitor effective, structured hand-over processes to facilitate both continuity of care and patient safety. Pertinent elements evaluated should include exam findings, laboratory data, any clinical changes, family contacts, and any change in responsible attending physician.
2. Programs must ensure that residents are competent in communicating with team members in the hand-over process.
3. Programs and clinical sites must maintain and communicate schedules of attending physicians and residents currently responsible for care.
4. Scheduling of on-call shifts should be optimized to ensure a minimum number of transitions, and there should be documentation of the process involved in arriving at the final schedule. The specifics of these schedules will depend upon various factors, including the size of the program, the acuity and quantity of the workload, and the level of resident education.
5. Each program must ensure continuity of patient care, in the event that a resident may be unable to perform their patient care responsibilities due to excessive fatigue or illness, or family emergency.
6. All residents and faculty members must demonstrate responsiveness to patient needs that supersedes self-interest. This includes the recognition that under certain circumstances, the best interests of the patient may be served by transitioning that patient's care to another qualified and rested provider.
