Keeping Your Internship/Field Experience Journal*

The purpose of keeping a journal during your internship or field experience is to assist you in documenting your hours, noting information for your journal summary/reflection, and assisting you in your personal growth and career exploration.

An internship or field experience falls under the rubric of "experiential education," and is not merely "work experience." To get full benefit from the work, you must be active in the learning process: You determine what you want to learn and how to do so. The following paragraphs can give you some idea about what to observe and write about (besides your daily activities), and help you make the most of your experience.

These quick tips may help you get started with your journal:

1. Keep a daily log. Document your hours by writing in the hours worked each day. Add them up periodically, and write in the total at the end of the journal entries. **You are expected to work 105 hours at your site for 3 credits, 210 for 6 credits and 280 for 8 credits.**

2. A detailed journal will assist you at the end of the semester by documenting information on the organization, the career path in your profession, your internship goals, and activities at the site. Keeping track of your activities and any other information will assist you in writing up your summary, as you might otherwise forget much of what you did. In addition to your daily activities, you must make REFLECTIVE ENTRIES about at least 4-5 various topics related to your experience during the course of the semester. Some ideas for topics to address are on the next page.
