CO-OPS AND INTERNSHIPS

Many UT programs have mandatory co-op or internship requirements. This gives you an opportunity to gain experience, network with professionals in your area of interest and show off all of that knowledge you’ve gained in the classroom.

UNDERGRADUATE RESEARCH

Research is more than Google searches and periodicals in the library. Take the opportunity to get into the lab — or out into the field — and work as part of a research team. Our undergraduates are helping identify new planetary objects, fighting harmful algal blooms in the Great Lakes and developing new methods to extract DNA to make cells more available for researchers. It’s big, important stuff. It’s hands on. And you get to do it, not just watch it.

EDUCATION ABROAD

UT puts education abroad opportunities within reach so that you can develop the experience of a lifetime studying in places throughout Africa, Australia, Europe, the Middle East, Southeast Asia and Central and South America. Whether you’re looking for an immersive cultural experience over summer break or a yearlong session abroad directly related to your program of study, UT can connect you with the experience of a lifetime and ensure that your academic credits transfer back toward your degree.
HANDS-ON LEARNING AND SIMULATION
UT provides students with opportunities for hands-on learning and simulation throughout their university experience. Students have access to mock court rooms, training labs and our state-of-the-art immersive simulation center featuring virtual reality and patient simulators.

SERVICE LEARNING
At UT, service learning provides the instant gratification that comes from putting to work your knowledge and knowing your work helped someone, whether it’s locally or globally.

HONORED
The Jesup Scott Honors College is designed to amplify your college experience at The University of Toledo. One of the most established honors academic programs in the country, the Jesup Scott Honors College provides Honors students with access to special Success Coaches, service-learning opportunities and exclusive on-campus housing.

As an Honors student, you could additionally complete your undergraduate degree in just three years. That leaves you perfectly positioned to continue your education in one of UT’s distinguished graduate or professional degree programs, including medicine, law, engineering, education, nursing and business. Or, jump into your career.
