As outlined above, my professional clinical activities encompass a variety of treatment orientations, as well as client populations in both community mental health and forensic settings. A long-time therapy interest has been treatment of couples and families utilizing systems and integrative therapy approaches. My primary assessment interests have been tied to my research in the assessment of conduct disorder, ADHD, and learning disabilities. Over the last 20 years, I have developed and implemented a variety of clinical service-research programs in public mental health settings. This includes the assessment of mental health recovery for individuals living with psychiatric disabilities and the promotion of holistic health and wellness through evidence-based such as Wellness Management and Recovery and Mindfulness and Acceptance-based treatment approaches.

RESEARCH EXPERIENCE:

Research Consultant, Ohio's Wellness Management and Recovery (WMR) Coordinating Center of Excellence. Columbus, OH (2005 - 2015).

Associate / Assistant Professor, Department of Psychology, University of Toledo. (1988 – present)

My primary research interests represent integration of research and practice in the area of public mental health and the promotion of mental health recovery for individuals with serious and persistent mental illness. My current research is focused in the area of mindfulness-based clinical interventions with adults in forensic settings and with children in primary school settings. My research program has received numerous research and training grants funded by the Ohio Department of Mental Health and the Ohio Office of Medical Assistance - Medicaid Technical Assistance Policy and Program (MEDTAPP) / Government Resource Council to support:

- 1) Collaborative clinical outcome research with the Ohio WMR Coordinating Center of Excellence, a training and technical assistance center funded by the Ohio Department of Mental Health, to develop and evaluate the *Wellness Management and Recovery* program.
- 2) Interprofessional training and collaborative research with faculty in the UT College of Medicine and Life Science in the area of public mental health and the integration of graduate training in clinical psychology with public mental health service.

Postdoctoral Clinical Research Fellowship, Department of Psychology, Bowling Green State University. (1986 – 1988)

Research activities included independent and conjoint projects in the areas of clinical gerontology and family research. Project coordinator for grant supported research headed by Dr. Nancy Jo Dunn that explored the individual and marital functioning of elderly community-based couples.

Acting Director, Personality Research Laboratory, University of Oklahoma. (1983 – 1984)

Responsible for operations and management of all phases of research activity. Independent research in the area of experimental personality. Electrophysiological explorations of theories of personality with biological / cognitive bases, such as introversion-extraversion.

Research Assistant for Dr. Kirby Gilliland, Department of Psychology, University of Oklahoma. (1980 - 1983). Duties included experimental design, data collection and analysis, report writing, and independent research.
