

## Center for Continuous Improvement

### **Agile Project Management**

One day (0.7 CEUs) and Two day Options (1.4 CEUs)

#### **DESCRIPTION**

In this modern, fast paced era of business, the traditional / “waterfall” approach to project management may not be the best approach. Agile project management has quickly become the go-to project management approach for a wide range of industries. According to the Project Management Institute (PMI®), more than 90% of organizations are using Agile to some degree. If your business is not using aspects of Agile, it will be soon.

#### **Topics Discussed and Studied**

- Project Management Foundation Concepts
- Why Agile Project Management?
- Traditional/Predictive Project Management vs. Agile Project Management
- Triple Constraints (Scope, Schedule, and Cost)
- When to use Traditional/Predictive vs. Agile Project Management
- Agile Manifesto
- Stakeholder Assessment & Key Decision Makers
- Agile Terms and Tools
- Communications Planning
- Project Team Development
- Quality Planning
- Risk Management Planning
- Workshop Provided Agile Case Study / Simulation

This course was designed to give you a working knowledge of agile project management. You will be able to use these concepts the very next day on your projects, thus giving you the edge over your competition. It follows the best practices for Project Management as outlined in the Guide to the Project Management Body of Knowledge (PMBOK Guide®) from the Project Management Institute (PMI®)
