

PV LV-100

Copiers that set the standard for excellence.

Every PIC Copier is designed with two things in mind – quality and dependability. To prove it, every copier we make is backed by a three-year Worry-Free Warranty that covers all services and repairs at NO CHARGE for three full years. Just think of it – a copier so reliable that all you have to think about is the time and money it's saving you.

And while this is our most economical copier, they come with a host of features you'd typically expect to find only in larger, more expensive copiers.

Automatic Exposure: The PI LV-100 automatically scans your originals and selects the proper exposure setting to give you perfect copies regardless of the original's quality.

18 copies Per Minute: Means you'll be able to handle your jobs quickly and efficiently.

Dual Color Copying: Add the impact of color to your copies with a touch of your finger and the PI LV-100's dual color copying system with easy-to-use toner cartridges.
