

THE UNIVERSITY OF TOLEDO ENHANCING PERFORMANCE AND IMPROVING OUTCOMES

The University of Toledo Interprofessional Immersive Simulation Center (IISC) employs a broad spectrum of the most innovative simulation technology to improve individual and team performance.

THE IISC:

- A unique Tri-Center Concept™ with Virtual Immersive Reality (VIR), advanced clinical simulation, and progressive anatomy and surgical skills settings.
- Interprofessional and multidisciplinary collaboration.
- Partnering with The University of Toledo Center of Excellence in Biomarker Research and Individualized Medicine.
- Collaborative relationship with the 711th Human Performance Wing (Human Effectiveness Directorate) at Wright-Patterson Air Force Base, USA.

UT RECOGNIZES THAT CIVILIAN HEALTH CARE AND MILITARY MEDICINE SHARE SIMILAR CHALLENGES:

- Improving outcomes of care and preserving life.
- Providing safe, effective training methods.
- Promoting improved efficiencies of care through team training.
