

TOP 10 AWESOME IDEAS FOR USING

It starts with a need.

From there, you begin exploring options. You do the homework, inquiring, researching and reviewing solutions. Then one day, you find the solution that meets your need. We imagine this is a similar path you ventured on the way to discovering TurningPoint. Our interactive polling software allows you to interact with learners and identify their understanding. But, that's just touching the surface.

We want our clients to realize the significance of TurningPoint.

Break the Ice

Create and use TurningPoint slides to emphasize a theme, incident or character important to the day's lesson. Include students in the discussion of the results.

Practice Makes Perfect

Ask a question, allow for peer discussion, and then re-ask the same question. Display results using the comparative slide function.

Award Attendance

Assign point values through TurningPoint to answers instead of simply setting them as right or wrong, and reward participation points.

Friendly Wager

Encourage team competitions and post participant or team leader boards.

It's All About Teamwork

Add group demographics or subcategories to your participant lists to track group achievement levels.

Long Distance Works

No location is too far or remote. Involve many locations at the same time with TurningPoint's mobile polling solution.

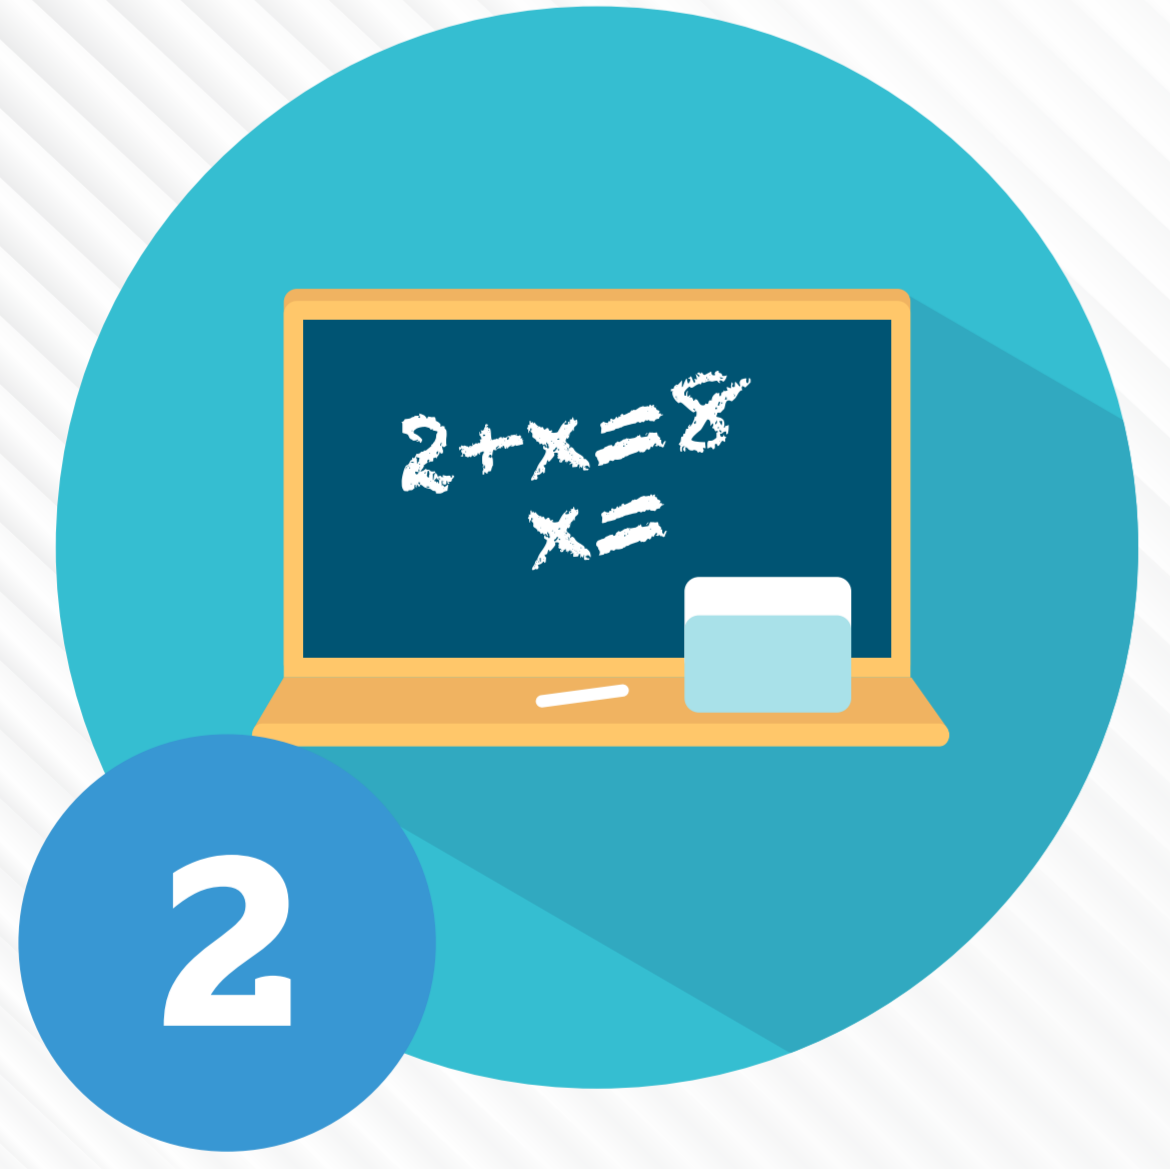

Fast & Furious

Use TurningPoint's Anywhere Polling for "agile instruction" by inserting questions during an active session.

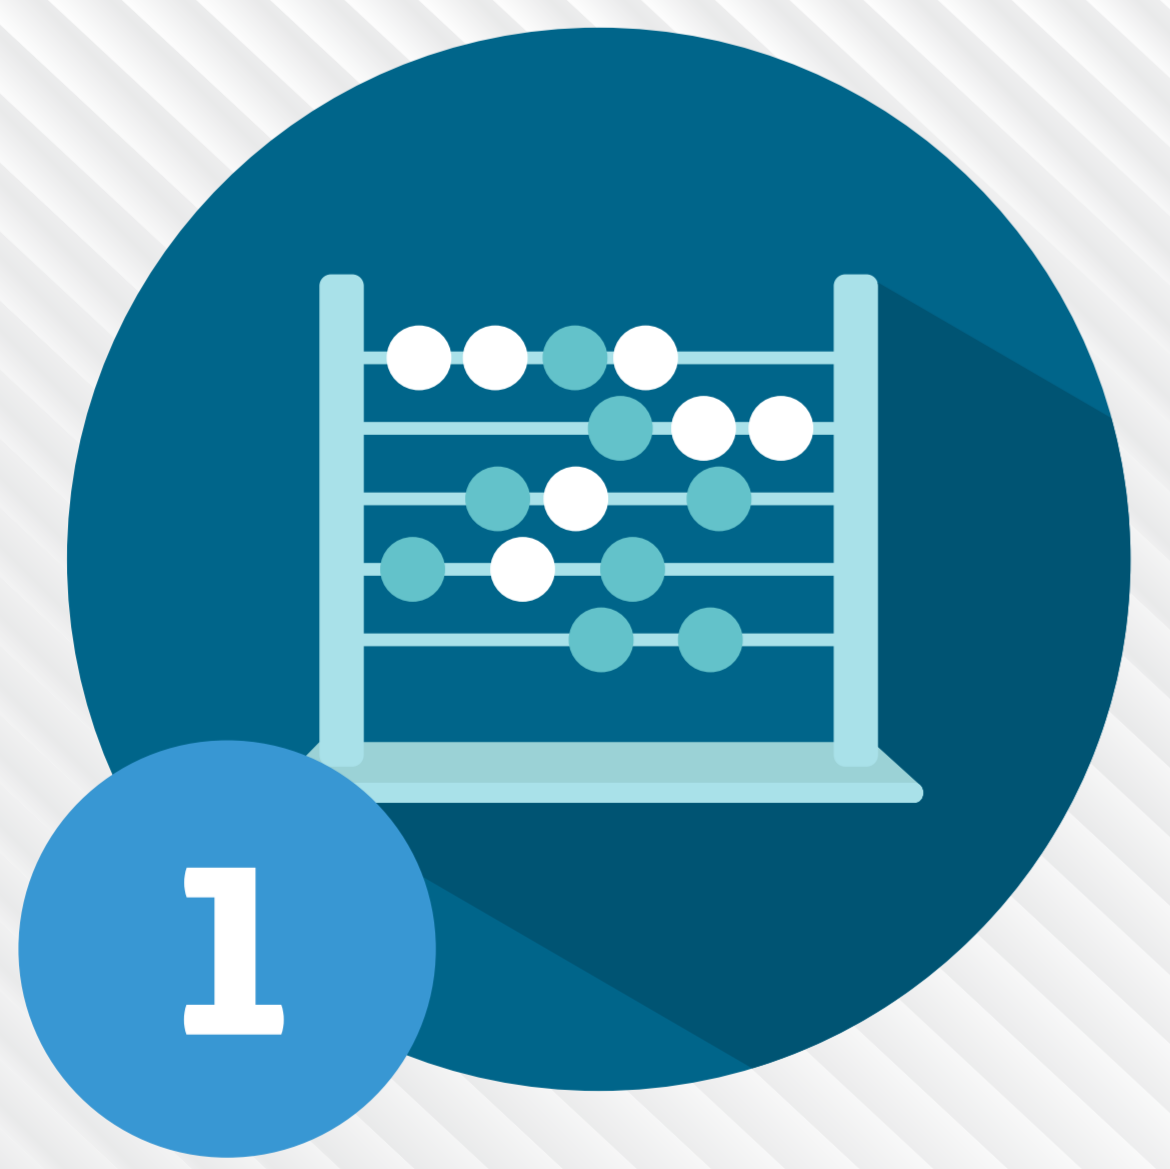

Formula for Success

Conduct research experiments and view statistics including mean, median, standard deviation and variance.

Not a Trick Question

Ask fill-in-the-blank questions to have learners submit unclear terms and topics.

Talk Data to Me

Track the success of programs and initiatives using TurningPoint to collect data.
