Subject: Post Meeting Agenda Notes 10-27-26 - Procedural & Surgical Services CVA

Below are the October post-meeting agenda notes.

Committee Updates
None

October Agenda Items

- *Request for Review*
  - Procedural Item: **Selution SLR Drug Coated Balloon (DCB)**
  - Clinical Champion: **Dr. Eltahawy**
  - Vendor: **Cordis**
  - Used for coronary instant restenosis cases
- Used in place of: Boston Scientific Agent DCB

Recommends trial. VAPM to work with the O.R. and contracting team to get a trial agreement in place as well with Coding to ensure we are properly setup for billing and charging. VAPM to send Dr. Eltahawy trial approval email w/ instructions as to next steps. Post trial, committee will evaluate to determine if Selution can completely replace Agent.

- *Request for Review*
  - Procedural Item: **Via Verte**
  - Clinical Champion: **Dr. Escobar**
  - Vendor: **Medtronic**
  - Used for Basivertebral nerve ablation (BVNA) cases.
- Used in place of: Stryker Optablate, for specific cases where there is difficult vertebral access, especially L5-S1 and hard bone. Long term outlook would be to add this system to the current formulary and not replace the Optablate.

Recommends trial. VAPM to work with the O.R. and contracting team to get a trial agreement in place as well with Coding to ensure we are properly setup for billing and charging. VAPM to send Dr. Escobar trial approval email w/ instructions as to next steps.

- *Request for Review*
  - Procedural Item: **Galaxy Robotic Bronchoscopy System**
  - Clinical Champion: **Dr. Turner**

- Vendor: **Noah Medical**
- Used for robotic bronchoscopy cases

- Used in place of: Intuitive Ion Robotic Bronchoscopy System.

Out of Scope. Committee has determined that the Ion capital and financial considerations fall outside the scope of the Procedural and Surgical Services CVA committee. Russ Smith will report this request up to the C-Suite for further review and next steps.

Thanks,
