**Attachments:** Procedural & Surgical Services CVA February 2026 meeting (1).pptx  
**Importance:** High

Good Afternoon Everyone,

Below are the February post-meeting agenda notes.

### Committee Updates

N/A

### Agenda Items

- What is Clinical Value Analysis?
  - **A cross-functional team of medical and administrative staff** that serves as a bridge between clinical and operational departments at UTMC, aligning clinical initiatives, medical equipment, and supply requests with the University's mission and core values.
  - **An organized forum** for stakeholders to systematically evaluate and prioritize requests.
  - **An executive led governance structure** that ensures decisions are aligned with institutional strategy, leadership priorities, and financial stewardship.

- Clinical Value Analysis Governance Structure

#### Executive Oversight Committee

- Meeting Cadence, Location and Times
  - The committee determined that a hybrid meeting is optimal to maximize committee member flexibility and participation. Those members that can meet in-person are encouraged to do so. Tyler will work to find a consistent location that is available for committee use.
  - Committee members voiced that they have a hard stop at 4:00pm, DR. Skie also provided that most physicians conclude cases around 3:00pm. Tyler will review schedules and see if we can find an optimal time that works for all parties.
  - Some committee members will not be available on Wednesdays; Tyler will review committee member calendars and look for a consistent day that seems to work for everyone.

- Additional Members
  - Committee recommended adding Rev Cycle as an additional member to the committee, Tyler will send an invite to Deb Carpenter and Nicole Staccone
  
- Conflicts of Interest
  - Committee discussed adding a conflict-of-interest question to request for CVA forms. This would allow committee to know if there is a potential conflict of interest with the customer or a committee member. Tyler will work with Supply Chain to integrate question into submission form.
  
- Request for Review
  - Procedural Item: Griplasty
  - Clinical Champion: Dr. Skie
  - Vendor: Field Orthopedics
  - Used for specific Arthroplasty cases
  - Used in place of Arthrex item: CMC Mini Tightrope (For these specific cases ONLY)

Committee **approved** a limited trial of the Griplasty. After Dr. Skie has been able to use the Griplasty device he will provide a debrief to the committee concerning his use in procedures and whether he would support permanent use.

Thanks,

**Tyler Spotts, CPPB**  
**Program Manager, Value Analysis**
