12. Catalog Description
    The course will address issues that impact school and mental health professionals. For example K12 teachers, school psychologists, clinical psychologists, social workers, school counselors, nurses, SROs. Theory and research on physical, cognitive, social, and emotional development are examined and used as the bases for

understanding child and adolescent development. Special attention will be focused on practical application.

Though the proposal is being put forth as an online course, the curriculum is easily modified into web assisted or recitation format. The goal is to offer it online, with the understanding that the department may need to alter the delivery mode should there be a specific cohort or instructor related need in a particular semester. EDP7240, the doctoral level course, will be put forward through the committee with separate documentation. You will note that students enrolled at the doctoral level must complete an application paper that requires full comprehension and application of a specific course topic.

Rationale: We do not offer a comparable course at the present time.
