Standard Operating Procedure

All sanitary sewer lines and manholes will be inspected annually and visual inspections will be performed quarterly.

Purpose

To ensure free running sanitary sewer lines.

Procedure

Quarterly:

1. Remove manhole cover.

2. Check and observe water flow in sewer and manholes. In any event of slow running sewers or possible backup of manholes, notify your immediate supervisor of this situation so that corrective action can be taken.

3. Lines will be cleared when necessary by an outside contractor.
