Catalog Description (only if changed) 75 words max:

Supervision of students' psychodynamic psychotherapy cases seen through The Psychology Clinic.

Catalog Description (only if changed) 75 words max:

This third-year practicum course includes participation, as an experienced student therapist, in a practicum team providing supervision of clinical services provided to children, adolescents, and/or adults seen through the University of Toledo Psychology Clinic.

Has course content changed?

Yes

No

If course content is changed, give a brief topical outline of the revised course below(less than 200 words)

The proposed course is designed to provide students in the third year of their clinical training program with supervised clinical experiences in the provision of therapy and/or assessment services to children, adolescents, and/or adults seen in the University of Toledo Psychology Clinic. Students will receive psychological supervision from the course instructor and peer supervision from other students enrolled in the practicum team.

Proposed effective term*: (e.g. 201140 for 2011 Fall)

Course Catalog Description

This third-year practicum course includes participation, as an experienced student therapist, in a practicum team providing supervision of clinical services provided to children, adolescents, and/or adults seen through the University of Toledo Clinic.

Practicum Overview

The purpose of this practicum is to continue to build upon students' knowledge of theory and principles underlying empirically supported treatments. As a third-year student in this practicum course, your role will be to apply the principles underlying empirically supported interventions in the delivery of effective therapeutic services for clients. This goal will be achieved through the reading of empirical literature on a number of topics relevant to the delivery of empirically supported treatments, class discussions and case presentations, the review of audio-visual materials, skills building exercises, and the practical application of gained knowledge through your clinical work. A major emphasis of this practicum will be the use of empiricism to guide clinical decision making. Not only will students be presented with information on empirically-supported treatments, but students will also become familiar with empirically-supported principles and mechanisms that underlie clinical disorders and effective interventions for these disorders.

An additional focus of this course will be on supervision and consultation skills. Specifically, third-year students enrolled in this course will read selected empirical articles on psychological supervision and consultation and will receive instruction from the faculty supervisor in these domains. Students will be expected to become familiar with models of supervision and consultation and to be able to discuss these models in the context of their own clinical work.

The touchstone of this practicum will be the use of empiricism to guide how we approach and work with clients. Practicum meetings will be organized such that a thematic area will be discussed, and the following week the application of some of this material will be presented by the clinical trainees in the

course of clinical case supervision. Each meeting will include ample time for clinical trainees to discuss clients and to problem-solve clinical challenges in a group or individual supervision format. This practicum also intends to serve as a supportive environment to express your views and questions regarding psychotherapy, supervision, and consultation, as well as to take time to commit to your professional development as a psychologist.

Prerequisite

Psychology 6390 (Clinical Laboratory)

Required readings

Please note that this is not an exhaustive list of readings for this course. Additional readings may be assigned depending on clinical issues that arise with clients, questions about specific topics, or student interest in gaining additional knowledge on specific cognitive-behavioral treatments. Electronic or hard copies will be provided to students.

Batten, S. V., & Santanello, A. P. (2009). A contextual behavioral approach to the role of emotion in psychotherapy supervision. *Training and Education in Professional Psychology, 3*, 148-156.

Clarke, P. B., & Giordano, A. L. (2013). The Motivational Supervisor: Motivational Interviewing as a Clinical Supervision Approach. *The Clinical Supervisor, 32*(2), 244-259.

Falender, C. A., Cornish, J. A. E., Goodyear, R., Hatcher, R., Kaslow, N. J., Leventhal, G., ... & Grus, C. (2004). Defining competencies in psychology supervision: A consensus statement. *Journal of Clinical Psychology, 60*, 771-785.

Gordon, P. K. (2012). Ten steps to cognitive behavioural supervision. *The Cognitive Behaviour Therapist, 5*(04), 71-82.

Johnson, W. B., Skinner, C. J., & Kaslow, N. J. (2014). Relational Mentoring in Clinical Supervision: The Transformational Supervisor. *Journal of clinical psychology, 70*(11), 1073-1081.

Liebowitz, B., & Blattner, J. (2015). On becoming a consultant: The transition for a clinical psychologist. *Consulting Psychology Journal: Practice and Research, 67*(2), 144-161.

Course Goals

By the end of the semester, it is expected that you will achieve the following goals:

- An awareness of ethical considerations regarding the practice and content of psychotherapy
- An understanding of the importance of diversity and individual differences when working with clients
- The ability to develop and present thorough case conceptualizations that can guide the development and delivery of effective cognitive-behavioral interventions
- Knowledge of empirically supported principles and mechanisms that underlie clinical disorders and effective interventions for these disorders
- An understanding of principles underlying effective supervision and consultation, as well as

supervision issues specific to empirically supported interventions

Learning Outcomes

Based on these practicum goals, the desired learning outcomes include:

- Explain readings and didactic material in terms of how they inform clinical practice
- Analyze course load and identify areas where learned material may be applied and practiced
- Identify inherent human limitations and recognize opportunities to grow as a clinical psychologist
- Engage in group supervision by making an effort to contribute to the development of your fellow trainee
- Demonstrate a receptiveness to think flexibly and inclusively, and to receive feedback

Grading

The grading of this practicum will be based on the extent to which the learning outcomes have been achieved. The modalities that will be used to achieve an estimate of the learning outcomes will include:

1. Participation, in particular participation in the form of group supervision,
2. Ongoing case presentations, in particular those that demonstrate integration of practicum material, and
3. An written final exam to assess comprehension of course content surrounding supervision and consultation.

This practicum will be graded on a pass/fail basis. Outright failure in modality (1), (2), or (3) will result in a failing grade.

Policy Statement on Non-Discrimination on the basis of Disability (ADA)

The University is an equal opportunity educational institution. Please read [The University's Policy Statement on Nondiscrimination on the Basis of Disability Americans with Disability Act Compliance](#).

Academic Accommodations

The University of Toledo is committed to providing equal access to education for all students. If you have a documented disability or you believe you have a disability and would like information regarding academic accommodations/adjustments in this course please contact the [Student Disability Services Office](#).

Practicum Expectations

- Students will attend group and individual supervision. If a student is not able to make a meeting, the student will schedule a meeting with the supervisor to complete weekly supervision. If the supervisor is unable to attend group or individual supervision meetings, either the supervisor will reschedule the meeting or another supervisor will be identified to provide coverage.
- Students will come to each group and individual supervision meeting prepared to discuss clients, present relevant audio-visual material, and discuss readings.
- Students will demonstrate a commitment to providing competent client care.

14		Psychological consultation
15		Student presentations
16		Student presentations

Rationale: This course is intended to be the third in a four-course sequence of practicum training courses. Each of these four courses will correspond to the student's year in the clinical training program (6810 for first year students, 6820 for second year students, 6830 for third year students, 6840 for fourth year students). The series of courses will be graded and sequential in terms of course content, such that each subsequent course will build upon the learning obtained in the previous course; this course will build upon the experiences students obtained in the context of PSY 6810 and PSY 6820. These courses will be conducted concurrently, such that students enrolled in each course will be meeting in the same room at the same time; different expectations will be in place for each student depending upon their year in the program and the course in which they are enrolled. PSY 6830 is intended to be the third-year course in this series and is designed to provide third-year graduate trainees with the experience of participating in a practicum supervision group as senior clinicians-in-training, as this will be their second year of carrying a clinical caseload. Students enrolled in this course will carry a caseload of clients seen through the University of Toledo Psychology Clinic and will receive clinical supervision for these cases from the course instructor, as well as provide peer supervision to their classmates. Students in this course will also receive specific instruction in supervision and consultation, will be responsible for readings in these areas, and will be required to complete an exam specific to this course content at the end of the course. Participation in group supervision throughout the semester, ongoing case presentations, and a written exam pertaining to supervision and consultation will result in a grade at the conclusion of the course.
