The University Of Toledo

NEW COURSE PROPOSAL

* denotes required fields

1. College*: Nursing
   Department*: College of Nursing

2. Contact Person*: Susan Sochacki
   Phone: 418-383-5806
   Email: susan.sochacki@utoledo.edu

3. Alpha/Numeric Code (Subject area - number)*: NURS - 7820

4. Proposed title*: CLINICAL THERAPIES FOR NEWBORN ILLNESSES
   Proposed effective term: Sp 2014

5. Planned enrollment per section: 10 per term: 10

6. Is the course cross-listed with another academic unit? ( ) Yes ( ) No
   If yes to either question, please list additional Alpha/Numeric codes, and
   submit a separate New Course form or Course Modification form for the
   course(s) referenced below.

   a. b. c.

   Approval of other academic unit (signature)

If course is to be offered at more than one level, attach an explanation of the different requirements that students must meet for each level. If the requirements are the same for each level, justification must be provided.

7. Credit hours*: Fixed: or Variable: to

8. Delivery Mode: Primary* Secondary Tertiary
   a. Activity Type†: Lecture +4 Regular-Lab
   b. Minimum Credit Hours 2 4
   c. Maximum Credit Hours 2 4
   d. Weekly Contact Hours 2 12

9. Terms offered: [ ] Fall [ √ ] Spring [ ] Summer
   Years offered: [ ] Every Year [ √ ] Alternate Years

10. Are students permitted to register for more than one section during a term? [ ] No [ √ ] Yes
    May the courses be repeated for credit? [ ] No [ √ ] Yes
        Maximum Hours

11. Grading System*: Undergraduate Graduate

   [ ] Academic Skills Enhancement [ ] Writing Intensive (WAC) [ ] Honors
   [ ] Univ. Core: English [ √ ] Hum [ √ ] Math [ √ ] Nat. Sciences [ √ ] Social Sciences
   [ √ ] Multicultural: Diversity of US Culture [ ] Non-US Culture
   (to be considered as core curriculum, question 18 must be completed)

12. Will this course impact program requirements? [ ] Yes [ ] No
    If yes, a Program Modification must be completed.

http://curriculumtracking.utoledo.edu/NewCourse.asp

12/9/2011
12. Prerequisites (must be taken before):
   a. NURS 7810
   b. NURS 7690
   c. 

   Co-requisites (must be taken together):
   a. 
   b. 
   c. 

13. If course is to replace an existing, course(s) will be deleted, and when should that deletion occur?

   Course to be removed from inventory
   a. 
   b. 
   c. 
   d. 

   Final Term to be offered (YYYYT. i.e. use 20064 for Fall'06)
   a. 
   b. 
   c. 

14. Catalog description* (30 words Maximum)

   See Attached

15. Attach an electronic copy of a complete outline of the major topics covered.

   Syllabus: 
   Additional Attachment 1: 
   Additional Attachment 2: 

16. Where does this course fit in the University/College/Department curriculum? (Be specific by course level, if applicable). Indicate prospective demand.

   Fourth semester in the BSN-DNP program.

17. If the proposed course is similar to another course in the College or University, please describe the difference and provide a rationale for the duplication. (If this course duplicates material covered in another course within your department or college or in another college, attach a letter of endorsement from that area's dean and department chairperson indicating their support. Clarify the manner in which this course will differ).

18. If the course is intended to meet a University Undergraduate Core requirement, complete the following and submit a course syllabus using the template:

   Please explain how this course fulfills the general education guidelines. (Guidelines are available in Faculty Senate Website)

Course Approval:

Department Curriculum Authority: 
Department Chairperson: 

http://curriculumtracking.utoledo.edu/NewCourse.asp 12/9/2011
After college approval, submit the original signed form to the Faculty Senate (UH 3320) for undergraduate-level courses; for graduate-level courses submit the original signed form to the Graduate School (UH3240). For undergraduate/graduate dual-level courses, submit the proposals to each office.

NURS 7820 Pediatric Nurse Practitioner Clinical II: Common Acute, and Stable Chronic Illnesses

COURSE CREDIT & CONTACT HOURS:
6 Credit Hours, 2 Theory Hours, 4 Clinical

PRE-REQUISITES:
NURS 7810 PNP Clinical I, NURS 7690 Advanced Pharmacotherapeutics

FACULTY: TBA

COURSE DESCRIPTION:
Care of children/adolescents with an emphasis on the management of common acute and stable chronic illnesses and APN role development. Includes therapeutic communication skills development with individuals and groups.

COURSE OBJECTIVES:
1. Analyze knowledge from nursing, medical and behavioral sciences using developmental models to diagnose and treat of common acute and chronic conditions of children and adolescents.
2. Synthesize behavioral and nursing theory in promoting positive health behaviors in primary care.
3. Apply epidemiological principles in clinical reasoning process with specific populations of children and adolescents.
4. Critique personal and professional development related to clinical decision-making in pediatric primary care.
5. Apply professional, legal and ethical standards in clinical practice.
6. Establish an environment that promotes ethical decision making and patient agency.
7. Examine core clinical issues across advanced practice nursing specialties.
8. Analyze personal abilities and limitations that have a potential to enhance or limit effectiveness in working with individuals and groups.
9. Describe the role of the APN as an advocate for healthcare for individuals and families.
10. Apply change agent strategies as they relate to the advanced practice role.
University of Toledo College of Nursing  
BSN to DNP Program  
Syllabus

NURS 7820 Pediatric Nurse Practitioner Clinical II: Common Acute and Stable Chronic Illnesses

COURSE CREDIT & CONTACT HOURS:
6 Credit Hours, 2 Theory Hours, 4 Clinical

FACULTY:
TBA

PRE-REQUISITES: NURS 7810 PNP Clinical I, NURS 7690 Advanced Pharmacotherapeutics

COURSE DESCRIPTION:
Care of children/adolescents with an emphasis on the management of common acute and stable chronic illnesses and APN role development. Includes therapeutic communication skills development with individuals and groups.

COURSE OBJECTIVES:
1. Analyze knowledge from nursing, medical and behavioral sciences using developmental models to diagnose and treat common acute and chronic conditions of children and adolescents.
2. Synthesize behavioral and nursing theory in promoting positive health behaviors in primary care.
3. Apply epidemiological principles in clinical reasoning process with specific populations of children and adolescents.
4. Critique personal and professional development related to clinical decision-making in pediatric primary care.
5. Apply professional, legal and ethical standards in clinical practice.
6. Establish an environment that promotes ethical decision making and patient agency.
7. Examine core clinical issues across advanced practice nursing specialties.
8. Analyze personal abilities and limitations that have a potential to enhance or limit effectiveness in working with individuals and groups.
9. Describe the role of the APN as an advocate for healthcare for individuals and families.
10. Apply change agent strategies as they relate to the advanced practice role.

Teaching/learning Strategies:
Lecture, class discussion, case studies, student presentations, online assignments or research related to class and clinical learning, evaluation of student assignments related to theory or clinical content, and small group discussions.
Course Grading Scale
A  91–100%
B  81–90%
C  71–80%
D  61–70%

Evaluation Strategies:

1. Students are expected to abide by the UT CON Academic Honesty Policy. The CON views cheating and plagiarism as a direct violation of the purpose of the educational program.

2. For examinations using scantron sheets and separate exam sheets, all scores will be determined by the scantron sheet. If there is a discrepancy between the scantron sheet and the examination sheet, credit will only be given for the scantron answer.

3. Students who need accommodation for a disability or health reasons are responsible for requesting accommodation from the faculty. Self-identification is the only way to assure that the faculty can provide the appropriate accommodation. Notification of appropriate UT staff is also required.

4. Faculty reserve the right to change course requirements in exceptional circumstances, with fair notice to students.

Assessment of Student Outcomes for Theory and Clinical Course Components:

1. Assessment of student progress is an ongoing process between both the student and the faculty throughout the course.

2. The student has a reciprocal responsibility for self-evaluation throughout the course, which includes, but is not limited to, initiation of individual conferences with the faculty member when needed.

3. Students with learning issues, test anxiety, or personal issues are encouraged to contact the Academic Enrichment Center at the University of Toledo Health Science Campus (419.383.6118).

4. The only valid excuses for missing an exam are a serious illness or death in the family. In either case, you must call the Course Coordinator before noon on the day of the exam. It is your responsibility to schedule a make-up examination with the Course Coordinator within one week of your return to UT. Exams will not be given early.

5. The clinical site and/or preceptor must be approved by the Course Coordinator and/or clinical faculty. It is not appropriate to function in a student role in your place of employment, nor can an employee or employer function as a preceptor.
Assignment (continued)

6. If for any reason, a preceptor requests a student not return to a clinical setting due to unsafe practice, inappropriate behavior, or failure to adhere to the preceptor’s guidelines, it may result in an automatic unsatisfactory clinical grade after review by the Course Coordinator and course faculty, in consultation with the NP Coordinator and Associate Dean of the Graduate Nursing Program.

7. Achievement of clinical objectives and requirements at a satisfactory level is required and will be evaluated by faculty with evaluation input from the preceptor. The student must successfully achieve the clinical performance elements of the course with a satisfactory clinical grade in order to progress in the clinical major.

8. All S/U assignments must be satisfactory in order to receive a course grade. The final course grade is based on a combination of the theory grade and clinical grade.

NAPNAP – [www.napnap.org](http://www.napnap.org)

**Clinical Expectations and Evaluation - Elements of the Clinical Evaluation**

A. Direct observation of clinical performance by preceptor/faculty
(See Preceptor Evaluation of Student Clinical Performance, pages 12-14)

Student performance is monitored and assessed in the clinical setting by the preceptor. The preceptor's evaluation is assessment included in the student's overall clinical evaluation. The preceptor will be sent an evaluation form from the CON and should return the form by week 15 of the semester. Phone contacts between the preceptor and faculty may be made at any time. Students will be evaluated by the preceptor using the following learning objectives for clinical:

1. Completes history & records systematically, accurately & succinctly
2. Performs PE & developmental assessment skillfully & systematically
3. Adapts evaluation techniques to the child’s age & developmental level
4. Reports history & PE finding concisely
5. Identifies a range of reasonable differential diagnoses (using S & O)
6. Suggests & prioritizes appropriate plans of care
7. Records exam findings systematically, accurately & succinctly
8. Suggests, performs & interprets routine lab tests appropriately
9. Provides accurate anticipatory guidance to parents and children during well visits
10. Provides accurate anticipatory guidance during ill visits
11. Suggests correct immunizations
12. Provides correct immunization information to parents & assesses for contraindications consistently
13. Suggests appropriate medications
14. Calculates medication dose based on child’s weight correctly
15. Suggests referrals as needed
16. Establishes rapport with child and parent
17. Establishes professional rapport with other staff members
18. Appropriately uses preceptor for consultation and improvement
19. Assumes responsibility & accountability for own actions
20. Demonstrates initiative in seeking learning opportunities
21. Uses self-evaluation to identify own areas of improvement

B. Expectations of the Student during Clinical Preceptorship:
The student must also take responsibility for his or her own learning needs, including:
1. Ability to identify own competencies and limitations in clinical performance
2. Communicates learning needs to preceptor and faculty.
3. Assertively seeks appropriate patient care situations.
4. Incorporates suggestions for improvement as recommended by faculty or preceptor.
5. Articulates rationale for clinical judgments; communicates rationale for clinical judgments to faculty and peers in clinical conference; provides rationale for decisions to clinical preceptor. The student may also be evaluated directly by the clinical faculty in the preceptor's setting or at the clinical practice of the faculty.

C. Clinical Hours, Attendance, Professional Attire during Clinical Preceptorship
Direct care clinical practice is essential for the acquisition of advanced practice skills. There is no substitute for the experience gained in direct care settings. This course requires 180 hours of direct patient contact. Students are expected to average 12 clinical contact hours weekly, and should have at least 60 clinical hours completed by midterm. All clinical hours must be completed by the first week of May 2007 in order to satisfactorily complete this course.

1. Direct patient contact includes time spent seeing patients in the clinical setting and time spent in consultation with the preceptor. Also included in the 180-hour clinical time are orientation hours (generally 4) and clinical conference time, as designated by the course faculty. No activity other than direct patient contact will be credited toward the clinical hour requirement (including professional conferences unless previously negotiated with Course Coordinator).

2. Students should report clinical difficulties to their clinical faculty or to the course director. In the case of a clinical emergency, the clinical faculty should be notified immediately. Failure to report for a clinical experience without contacting both the preceptor and the clinical faculty will be considered unsatisfactory clinical performance.

3. Professional dress and conduct will be the standard. While in the clinical setting the
D. Collaboration, Progression, and Documentation
1. After one-half to one day of orientation, the NP student will collaborate with the preceptor on the selection of patients for assessment and management. Initially, students can expect to work with 1 or 2 patients each hour.

2. By about the third week of clinical time, the NP student will be expected to become more independent in approach to patient care. The student will be able to collect initial subjective/objective data, develop a working list of probable and possible diagnoses, and suggest a potential plan for treatment and follow-up in collaboration with their Preceptor.

3. The NP student will collaborate with their preceptor to discuss the accuracy of assessment findings, diagnosis, and plan of care. Expect to take some risks in stating your findings and suggested plan of care—you are not expected to be right all the time.

4. Documentation of patient encounters will be recorded each week in the Typhon Database, with identifying information removed.

Assignments

Clinical Plan - S/U
By week 2 of the semester, each student will submit a written plan for achievement of clinical hours to their clinical faculty. This plan must include specific information including the projected days of the week for clinical experience, the specific clinical site for each projected day, the projected number of hours per clinical day (e.g. Wednesdays, 4 hours; Thursday, 8 hours), and the name, address, fax, and contact phone number of preceptor.

Weekly Clinical Log - S/U
Weekly clinical logs are recorded in the Typhon system, and are due weekly. Include clinical hours/week and cumulative hours to date at the end of each Typhon note. The Precepted Clinical Hours Record to document clinical hours, with Preceptor verification, is due each class day.

Clinical Case Study Presentation - 10%
Over the semester, the student will write up and present 1 structured clinical case presentation during the clinical conference hour. The outline for these presentations is follows. Presentations should be about 20 minutes in length, with a brief time for questions afterwards. The discussion should focus on an interesting patient or family you have seen in clinical. The focus of these presentations is to be focused on acute and chronic stable issues. This assignment is designed as a professional presentation to your colleagues. (Refer to Case Grading criteria, page 11)
Outline of Content for Clinical Case Study/Presentation

1. Chief complaint.
2. Identify and discuss developmental, psychological, and cultural issues relevant to your client and his/her diagnosis, and treatment. Reference appropriate research and clinical literature.
3. Relevant history including past medical history and pertinent family history (include a genogram of your client), currents, developmental, and psychosocial data. Provide a genogram relevant to this child/family.
4. Exam findings (briefly note any abnormalities or note as WNL). Include any developmental assessment.
5. Develop a table that lists all diagnostic hypotheses that were generated in your assessment of this patient. State the single most important objective and subjective piece of information used in making the diagnoses. Conclude with your final diagnosis(es) for this visit.
6. Goals (what goals do you have for this child and family relative to the diagnoses.
7. Plan (all actions taken, including educative, diagnostic, treatments, follow-up).
8. Briefly discuss and document from the clinical and research literature etiology, prevalence, etc of wellness, developmental, and/or clinical problem. Include a copy and critique of an evidenced based journal article that guided your decision-making.
   (Reference list in APA format to be provided for all conference participants.)
9. Why did you choose this case? Any changes in your actions? Would you do anything different? Why?
10. Provide a reference list in APA format for all participants.

Over-the-Counter (OTC) Medication Project – 10%

The main objective of this activity is to make the PNP student aware of the many OTC products available to parents and to heighten awareness of the different brands of each OTC in just one category—as well as differences in expense, instructions for parents, dosing, etc. An additional objective is to help the student educate parents in making decisions concerning OTCs chosen for their child.

Students will choose four (4) of the following categories for their investigation and report. From each of the four categories, select two products to compare & contrast. (There will be 8 products per student).

1. Fever, pain
2. Cough, cold, flu
3. Allergy
4. Stomach ache, heartburn
5. Constipation, diarrhea
6. Skin – moisturizers, anti-itch medications
7. Skin – insect repellants, sunscreen, sunburn
8. Vitamins & minerals, herbal supplements

Grading of this activity is based on completeness; grading percentages for each step are indicated
in parentheses. This project will be presented to student peers and/or faculty as scheduled.

1. Visit a pharmacy or retail store that sells the OTC products; select at least 2 brand name or generic products for children in each of the categories you are searching (There will be at least 8 products) (20%)
2. List the product by name and cost (10%)
3. Include the active ingredients and action for each product (10%)
4. Indicate the dosage range for infants, children, and adolescents; indicate if packing states that any dosing device is included; if so, can you determine the accuracy of the device (20%)
5. Indicate whether you would recommend any products to your patients--if so, which ones and why. Use literature guidelines when available. (20%)
6. Submit 3–4 typed pages, or tables, on the medications in your OTC category for distribution

**SOAP Notes - 15%**

Three acute care SOAP documentations are due to faculty as assigned. Each SOAP note is also included in the Typhon database. SOAP notes will be evaluated by faculty using the following guidelines. This point system is to be used by the student as a guide to determine integration of concepts and faculty feedback, and is not intended to be an absolute evaluation protocol. (Refer to SOAP grading criteria, page 10)

There are 35 total possible points for each SOAP note:

- **10 points:** (S) subjective. In this section are pertinent elements of the CC, HPI with current health status, PMH, FH, Developmental milestones, pertinent psychosocial history and Gyn (as needed), as well as subjective review of systems are documented.
- **8 points** (O) objective. In this section, document physical findings related to HPI or well visit; elements of focused exam are included; stated in accurate terminology
- **4 points** (A) assessment. In this section, document the diagnosis (stated correctly, as supported by S & O data. Developmental and Preventive health issues are also addressed
- **5 points** (P) plan. In this section include diagnostic tests ordered, therapeutic interventions, referrals, education, anticipatory guidance and follow-up instructions. Include prescriptions, in the standardized format, with all identifying information removed, with the SOAP notes
- **8 points** Evaluation of the patient encounter, information collected and documented, diagnostic thinking, diagnosis, and level of patient encounter (LOE). Self-evaluation of the SOAP and patient encounter will be done with each submitted SOAP note because self-evaluation is critical for role
development. The successful student will critically analyze personal clinical performance and learn from each patient encounter.

** In general a score of at least 28 points is required on each SOAP to be considered satisfactory at the 80% level.

Student Signature: ___________________________ Date: ___________________________
Levels of Student Performance in Clinical Practice
Five levels of clinical performance are described below. Read the standards for each level of competency in order to determine the performance level of the student you are precepting.

INDEPENDENT
Performs procedures and patient evaluations safely and accurately each time observed without direction from preceptor.
Demonstrates dexterity.
Consistently spends an appropriate amount of time on each patient visit.
Appears relaxed and confident during performance of task. Applies theoretical knowledge accurately each time.
Focuses on the child and parent while giving care.

SUPERVISED
Performs procedures and exam safely and accurately each time observed.
Requires supportive confirmation or specific directions occasionally during performance of care.
Demonstrates coordination but uses some unnecessary energy to complete procedures and assessments.
Spends a reasonable amount of time on patient visits.
Appears generally relaxed and confident, only occasionally displaying noticeable anxiety.
Applies theoretical knowledge accurately with occasional suggestions.
Focuses on child and parent initially but as complexity increases, focuses on own behavior and skill.

ASSISTED
Performs safely and accurately each time observed.
Requires frequent verbal directions and occasional direct physical assistance with assessments and care.
Demonstrates partial lack of skill and/or dexterity in parts of caregiving activity; awkward.
Takes a long time to complete assessments and instruction; occasionally late.
Appears to waste energy due to poor planning.
Identifies theoretical principles, but needs direction to identify application.
Focuses primarily on own behavior/skill, not on child and parent.

PROVISIONAL
Performs safely under supervision, not always accurate.
Requires continuous verbal and frequent physical directions and assistance.
Demonstrates lack of skill; uncoordinated in majority of patient evaluation and management.
Performs tasks with considerable delay; activities are disrupted or omitted.
Wastes energy due to incompetence.
Identifies fragments of theoretical principles; often applies principles inappropriately.
Focuses entirely on own behavior/skill.

DEPENDENT
Performs in an unsafe manner; unable to demonstrate behavior.
Requires continuous verbal and physical directions and assistance. Performs in an unskilled manner; lacks organization. Appears frozen, unable to move, non-productive. Unable to identify principles or apply them. Attempts procedures or patient evaluations but is unable to complete them. Focuses entirely on procedure or own behavior/skill.
