Changes and Reason for Changes (Less than 1500 words or 5000 bytes)

The Department of Physics and Astronomy is realigning its physics laboratories, in part because there is a new program being administered -- Master of Science in Physics, Professional Degree in Photovoltaics. This new lab (PHYS 6280), which was included in the package of changes in courses/labs to the College Curriculum Committee, will replace the current requirement PHYS 6180.

Replace PHYS 6180 (Modern Physics Laboratory -- proposed change in name to Atomic and Nuclear Physics Laboratory) with PHYS 6280 (Photovoltaic Materials and Device Physics Laboratory) during Fall, Year 2 of the program.

See attached for further details.

Attachment (If more than 5000 bytes are needed for the change description):
