Impact on student learning:

) This equipment will allow for sophisticated analyses needed to understand the genesis and contributing physiological/psychological factors associated with joint injury. Specifically, we will use the cutting edge equipment to teach undergraduate and graduate students interested in athletic training, pre-PT and biomechanics about the altered movements that may cause joint injury. We believe that this equipment is vital to our ability to train the next generation of imaginative researchers and clinicians to ensure that innovative research and treatment will continue from our students in the future.

- ***Equipment/Technology purchased with Tech Fee funds is for student use only. It cannot be filtered or “passed-down” to faculty or staff.***
- All outdated or broken Tech Fee equipment/technology must be returned to the Tech Fee Committee for retirement or disposal.
- If you are submitting a request for computers, printers, scanners or software, you must consult with College Computing and the technology staff, to acquire a quote and to make sure that this equipment/software is supported by UT.
- For software, please note below if you are requesting it as a one-time expense or as an on-going fixed expense.

Subject: RE: licenses for V3D and Cortex?

Hi

I heard back from the Visual 3-D people. A single permanent license is \$1800. However, they said that we could get a yearly license for 15 student copies for \$750. This might be a better way to go, as it would allow us to put copies on multiple machines for student use.

I didn't yet hear back from Motion Analysis on the Cortex license. However, the last time that we added a license the cost was \$200. I have an email in to them requesting an update. As soon as I hear back I'll let you know.
