Impact on student learning:

This equipment will allow the students to practice motion analysis using state-of-the-art software that is not currently available in the program. This software allows analysis of images obtained from multiple cameras and will facilitate improved comprehension of the mechanics of complex movement patterns such as gait and pathological motion resulting from various disease entities, as well as to analyze the various mechanical components of normal and abnormal posture. Students will also be able to analyze the effect of various therapeutic interventions on movement.

- **Equipment/Technology purchased with Tech Fee funds is for student use only. It cannot be filtered or "passed-down" to faculty or staff.**
- All outdated or broken Tech Fee equipment/technology must be returned to the Tech Fee Committee for retirement or disposal.
- If you are submitting a request for computers, printers, scanners or software, you must consult with College Computing and the technology staff, to acquire a quote and to make sure that this equipment/software is supported by UT.
- For software, please note below if you are requesting it as a one-time expense or as an on-going fixed expense.
