JHCEHSHS STUDENT TECHNOLOGY FEE REQUEST FORM

Procedure for Submission:

Form Updated: 12/10/12

1. Submitter must obtain all required information from the desired vendor(s). An official quote from the vendor must be attached.
2. Only one request per Request Form. This request must be reviewed, approved, and submitted by the requesting program's Department Chair.
3. The Dept. Chair may email this request to the Tech Fee Director. *Since some departments will have multiple requests, please rename request in the following format: Dept # (rank, 1 being the highest priority) and a brief title*

Dept. making request:	Criminal Justice/Social Work/ Legal Specialties	Requesting Faculty:	A.M. Dier Kasey Tucker-Gail	Date Submitted:	January 31, 2013
-----------------------	--	---------------------	--------------------------------	-----------------	------------------

IMPORTANT: Attach an official quote from the vendor.

List one item OR group (for use as a "package") per page.

Item Name	Vendor info. (name, address, Web site URL, phone #, email, etc.)	Part or Model #	Cost (each)	Qty	Total
1.Crime Scene Tape	Crime Scene Supplies 3440 N. 16 th Ste #4 Phoenix, AZ 85016 www.crimescene.com	30955066851	14.00	10	140.00
2.Synthetic Blood		1-syntheticblo	10.00	2	20.00
3.Blood Splatter Kit		10-550	179.00	1	179.00
4.Blood Spatter refill kit		10-550R	65.00	1	65.00
5. Footprint Casting Powder		TRXT-20BB	87.95	1	87.95
					491.95 Total

Course(s) where item(s) will be used	Criminal Investigation I, II, III and Child Advocacy certified program	Expected life of product (years)	5yr	# Students Impacted per Year	200
Location equipment or software will be used/stored	HHS Forensic Science Lab Rm 3011	Will Tech Fee funds be needed for annual renewals or maintenance?	no		

Provide a brief description of the technology requested*:

1. Crime Scene Tape will be used to define crime scenes correctly.
2. Synthetic Blood will be used to recreate blood patterns, pools etc. in crime scenes.
3. Blood Spatter kits will be used to recreate blood spatter/patterns in crime scenes.
4. Blood Spatter refill kits will be used to refill the blood spatter kits as necessary.
5. Footprint Casting Powder will be used to collect evidence such as tire tracks and footprints.

Briefly describe how the technology will be used (function)*:

- 1. The crime scene tape will be used to document and define crime scene areas. Students will use these in conjunction with multiple tools, like the forensic bodies, cameras, casting frames and other technology provided by the tech fee as part of the overall process of learning crime scene investigation through technology.**
- 2. The Synthetic Blood will be used to create/recreate crime scenes as well as evidence collection. Students will use these frames in conjunction with other tech fee technology to collect evidence as a practical form of technology.**
- 3. The Blood Splatter Kits will be used to recreate/create crime scenes and to teach students how to identify and document blood splatter patterns.**
- 4. The Blood Splatter Kits will be used to refill the kits as necessary.**
- 5. The Footprint Casting Powder will be used to collect evidence by the students in the crime scenes. Students will use this to collect evidence in our mock crime scenes.**

****We realize that these items are not reusable. We are requesting a one time purchase of these items and have already taken steps for the next academic year to include lab fees for related classes to replace these items in the future as necessary. ****

These items will be used in several forms in the investigative process, all of these pieces of applied and practical technology will be used in that process. All of these items will be used directly by the students to learn the required investigative skills, and provide an imperative practical experience, with the use of several other pieces of technology such as ultra violet lights, microscopes, and crime scene markers already provided by the tech fee.

Provide a rationale that Tech Fee funds are appropriate for this request*:

All of these items will be used in the teaching of numerous students, in 4 separate course offerings. Multiple sections of Criminal Investigation I, Criminal Investigation II and Criminal Investigation III are taught every year as well as the Child Advocacy Courses jointly taught in both the criminal justice and social work programs. They are reusable and provide for a variety of practical learning experiences. They move beyond the form of instruction to the practical application of knowledge and use of technology by the students.

***Keep in mind that the committee members come from a variety of educational backgrounds and may not be familiar with department specific language. Please use concise, common terminology so that committee members reviewing this form will be able to fully understand the request.**

- If you are submitting a request for computers, printers, scanners or software, you must consult with College Computing and the technology staff, to acquire a quote and to make sure that this equipment/software is supported by UT and compatible with existing technology.**

[Product description](#)

[Reviews](#)

This tape says Crime Scene Do Not Cross.

Bright yellow official barrier tape is useful for blocking off danger areas. Restrict access to crime scenes with this highly visible yellow polyethylene tape. Printed with large black letters. 1000 ft long, 3 inches wide, 3.5 mil thick.

The Crime Scene tape is priced lower than the others tapes due to a volume discount that allows us to pass the savings to our customers.

A bulk discount is available for quantities over 8 rolls.

[Product description](#) [Additional images](#) [Reviews](#)

If you intend to carry out an experiment with luminol, heme-slix or a blood-related project, our synthetic blood will allow you to work safely. There are no biological ingredients to this solution. Available in 1 or 8 ounce bottles. **Note:** Synthetic blood does not show up under UV light. Not for human consumption.

In addition to chemical synthetic blood we also carry theatrical stage blood products. All blood products are listed below. Select the item you want using the pull-down menu.

Stage Blood: authentically simulates the color and viscosity of real blood for any professional application including theater, film or disaster training. Available in 2 oz containers and safe for use in the mouth, Stage Blood is excellent for use in blood capsules and has a zesty mint flavor.

Fresh Scab: is a gel-like dark blood creates 3-dimensional wounds and scabs. The outer layer "scabs" over. Apply with Thick Blood for greater realism. Available in a 1oz container and safe in mouth but do not ingest.

Gelatin Blood Capsules: 1/2 oz blood with 12 capsules in a convenient case. Open capsule, and fill one half nearly full with blood. Capsules hold their shape even if not used for several days. Minty flavored and safe to use in mouth. Place in mouth and bite down to release blood.

Synthetic blood is a chemical product. It does not mimic the appearance of blood and is not useful for creating fake crime scenes.

Choose from Synthetic Blood, Stage Blood, Fresh Scab, or Gelatin Blood Capsules using the pull-down menu.

Science Education

Blood Spatter Kit (10-550) (\$179.95)

Add to Cart:

Product description

The Blood Spatter Kit consists of 6 different experiments to work through with students/children. This kit helps children learn how physics plays a role in a criminal investigation such as blood spatter. Students will complete the experiments and learn things like how gravity affects a stain pattern.

The Blood Spatter Kit is for use under the supervision of a parent or teacher by grades 8-14

The materials in this kit are sufficient for 24 students working in groups of 2 or 4.

Use the pull-down menu to select a full kit or a refill kit.

Product description

Make evidence impressions on the spot with no mess and no hassle. Footprint Casting Powder is a diestone dental stone material that gives a green color, highly detailed impression with minimum setting time. Just add water and mix in the self-seal bag. We also carry footprint casting frames. [Details here.](#)

Includes 20 bags (1.5 lbs per bag) of casting mix, casting sealant spray and directions.

Features / Benefits Include:

- Footprint Casting Powder provides superior detail reproduction and durability.
- It has a higher compression strength (18,000 psi) than other casting material (8,000 - 14,000 psi).
- Footprint Casting Powder also has less expansion (0.09% vs. 0.11%)
- Indicator pigments let you know when it is ready to use.
- Setting time is approximately 12 to 15 minutes
- The kit is easy to store and easy to carry.
- There is no need to repackage bulk material and no worry about moisture.
