Course(s) where item(s) will be used	All student teaching and upper division counseling courses	Required for accreditation?	No	# Students Impacted per Year	300
Location equipment or software will be used	GH 5100	Will this be an ongoing expense (if yes how much annuall)?		Yes.	

Impact on student learning (attach additional pages if needed):

The TLE TeachLivE™ Lab is a mixed-reality teaching environment that supports teacher practice in pedagogy and content. In the TLE TeachLivE™ Lab, pre-service and in-service teachers walk into a simulated middle-school classroom where the room is real but the students are digital avatars. The virtual students controlled by real trainers are made to act like typical (or atypical) pre-teens, depending on the objectives of the experience. Each student's personality is based upon those typically encountered in a middle school classroom.

The TeachLivE™ Lab, developed at the University of Central Florida, is currently being delivered to ten campuses in the United States. TLE TeachLivE™ participants can interact with virtual students and review previous work; present new content to students; provide scaffolding or guided practice in a variety of content areas; and monitor students while they work independently.

Ongoing expense would be to pay for the $120/hour use cost of the Simulation Center.

- ***Equipment/Technology purchased with Tech Fee funds is for student use only. It cannot be filtered or "passed-down" to faculty or staff.***
- All outdated or broken Tech Fee equipment/technology must be returned to the Tech Fee Committee for retirement or disposal.

- If you are submitting a request for computers, printers, scanners or software, you <u>must</u> consult with College Computing and the technology staff, to acquire a quote and to make sure that this equipment/software is supported by UT.
