

JHCEHSHS STUDENT TECHNOLOGY FEE REQUEST FORM

Procedure for Submission:

Form Updated: 12/10/12

1. Submitter must obtain all required information from the desired vendor(s). An official quote from the vendor must be attached.
2. Only one request per Request Form. This request must be reviewed, approved, and submitted by the requesting program's Department Chair.
3. The Dept. Chair may email this request to the Tech Fee Director. *Since some departments will have multiple requests, please rename request in the following format: Dept # (rank, 1 being the highest priority) and a brief title*

Dept. making request:	Rehabilitation Sciences	Requesting Faculty:	Max Baumgartner Michelle Masterson	Date Submitted:	1-15-13
-----------------------	-------------------------	---------------------	---------------------------------------	-----------------	---------

IMPORTANT: Attach an official quote from the vendor.

List one item OR group (for use as a "package") per page.

Item Name	Vendor info. (name, address, Web site URL, phone #, email, etc.)	Part or Model #	Cost (each)	Qty	Total
iPad tablet for use in gross anatomy lab. One tablet will be used for each table (assigned to 7-8 DPT students)	Apple Inc. (http://store.apple.com/us/buy/home/shop_ipad/family/ipad)		\$599.00	4	\$2396.00
Griffin Survivor iPad case	Griffin, 2030 Lindell Ave, Nashville TN 37203 (http://store.griffintechnology.com/survivor-ipad-3)	SKU: GB35380	\$79.99	4	\$319.96
Course(s) where item(s) will be used	PHYT 5000 Gross Anatomy	Expected life of product (years)	5	# Students Impacted per Year	29
Location equipment or software will be used/stored	HH 2520/2520A (will not leave campus)	Will Tech Fee funds be needed for annual renewals or maintenance?	no		
Provide a brief description of the technology requested*: Hardware with which students can access related software and internet resources for anatomy lab.					
Briefly describe how the technology will be used (function)*: The iPad tablets will be used in anatomy lab (1 per cadaver) and will allow DPT students to easily access online dissector and atlas content. This content provides full color, interactive images and video-based instruction. The iPads also enable students to conveniently access internet resources while in anatomy lab.					
Provide a rationale that Tech Fee funds are appropriate for this request*: It is cost prohibitive and not necessary for each student to purchase an Ipad, as only 4 are needed, Rather the tech fees students pay each semester can be used to purchase these 4 Ipads, which would allow for most effective and efficient use of time and resources while in gross anatomy lab.					

***Keep in mind that the committee members come from a variety of educational backgrounds and may not be familiar with department specific language. Please use concise, common terminology so that committee members reviewing this form will be able to fully understand the request.**

- If you are submitting a request for computers, printers, scanners or software, you must consult with College Computing and the technology staff, to acquire a quote and to make sure that this equipment/software is supported by UT and compatible with existing technology.

iPad with Retina display at a glance.

Breakthrough Retina display
The Retina display on iPad makes everything look crisp and lifelike. Text is

What's in the box

iPad with Retina display
Lightning to USB Cable

razor sharp. Colors are vibrant. Photos and videos are rich with detail. All thanks to its 3.1 million pixels — a million more pixels than an HDTV.

Powerful A6X chip

The new A6X chip inside iPad is up to twice as fast as the previous-generation A5X chip, and it delivers up to twice the graphics performance, without sacrificing battery life. Which means even the most advanced apps are smooth, responsive, and incredibly lifelike.

Over 300,000 apps

Apps for iPad aren't like anything else. That's because every app — 300,000 and counting — is designed specifically for iPad.² And with apps in just about every category, you can do things like make a commute more entertaining, a presentation more interesting, or a school lesson more inspiring, right from your iPad.

Ultrafast wireless

The new iPad with Retina display features advanced Wi-Fi that's up to twice as fast as any previous-generation iPad. And access to more cellular data networks around the world makes it fast in more ways than one, and in many more places.

USB Power Adapter

Limited warranty

Every iPad comes with a one-year limited warranty and complimentary telephone technical support for 90 days from the date it was purchased.

Choose the iPad that's right for you.

What's the difference in storage sizes?

iPad with Retina display comes in four storage sizes: 16GB, 32GB, 64GB, and 128GB.³ The term "GB" stands for gigabytes. The more gigabytes you have, the more content you can store on your iPad — apps, HD videos, movies, photos, books, magazines, and more. If, for example, you have a large music library or you frequently download HD movies, it's a good idea to consider an iPad with a larger storage capacity. If you have a relatively small music or photo library or rarely make or buy movies, an iPad with a smaller capacity may be better for you. Of course, over time you will add more content to your iPad, so you'll want to think about how your storage needs may evolve.

Wi-Fi or Wi-Fi + Cellular?

Wi-Fi model: Uses high-speed Wi-Fi networking to connect to the Internet. It's ideal if you have a wireless Internet router in your home or if you'll be using your iPad near a wireless hotspot in a coffee shop or school library, for example. There are Wi-Fi hotspots nearly everywhere around the world — iPad with Wi-Fi finds them automatically.

Wi-Fi + Cellular model: Keeps you connected to the Internet using a fast cellular data connection when Wi-Fi isn't available. So you can stay connected when you're commuting on the train, hanging out at the park, or looking for directions during a road trip. It's available without a contract, and service is sold separately. See your carrier for rate plan information.

	250MB per month	\$14.99	Visit AT&T site for coverage map.
	3GB per month	\$30.00	
	5GB per month	\$50.00

Using the LTE cellular network from AT&T, Sprint, or Verizon

iPad with cellular capability lets you connect to fast data networks worldwide — up to LTE.¹ So you can connect to the Internet even when Wi-Fi isn't available.

No-commitment data plans from AT&T, Sprint, or Verizon

In the U.S., you can choose from data plans with no long-term contract.

Easy signup

You sign up for data service right on your iPad. And you can monitor your data usage and change your plan at any time, including adding data or canceling service if you know you won't need it.

Warranty

Limited Warranty

Every iPad comes with a one-year limited warranty and complimentary telephone technical support for 90 days from the date it was purchased.

AppleCare+

AppleCare+ for iPad extends your coverage to two years from the original purchase date of your iPad and adds up to two incidents of accidental damage coverage. Just add AppleCare+ during the checkout process.⁴

[Technical Specifications](#)

[Open](#)

1. Data plan required. LTE is available in select markets and through select carriers. Check with your carrier for details. Speed will vary based on site conditions.
2. Refers to the total number worldwide. Not all content is available in all countries.
3. 1GB = 1 billion bytes, actual formatted capacity less.
4. AppleCare+ for iPad provides coverage for up to two incidents of accidental damage from handling. Each incident is subject to a \$49 service fee.
5. Actual size and weight vary by configuration and manufacturing process.
6. Cellular data plan is sold separately. The model you purchase is configured to work with a particular cellular network technology. Check with your carrier for compatibility and cellular data plan availability.
7. FaceTime video calling requires a FaceTime-enabled device for the caller and recipient and a Wi-Fi connection. Availability over a cellular network depends on carrier policies; data charges may apply.
8. Testing conducted by Apple in October 2012 using preproduction iPad (4th generation) units and software. Testing consisted of full battery discharge while performing each of the following tasks: video playback, audio playback, and Internet browsing using Wi-Fi or cellular data network. Video content was a repeated 2-hour 23-minute movie purchased from the iTunes Store. Audio content was a playlist of 359 unique songs, consisting of a combination of songs imported from CDs using iTunes (128-Kbps AAC encoding) and songs purchased from the iTunes Store (256-Kbps AAC encoding). Internet over Wi-Fi and cellular data network tests were conducted using dedicated web and mail servers, browsing snapshot versions of 20 popular web pages, and receiving mail once an hour. All settings were default except: Wi-Fi was associated with a network (except for Internet browsing over cellular data network); the Wi-Fi feature Ask to Join Networks and Auto-Brightness were turned off. Battery life depends on device settings, usage, and many other factors. Battery tests are conducted using specific iPad units; actual results may vary.
9. Wireless broadband recommended; fees may apply.

*To identify your iPad model number, see <http://support.apple.com/kb/HT5452>. For details on LTE support, contact your carrier and see www.apple.com/ipad/lte.

Ridiculously over-engineered? Or the perfect case for your iPad no matter where you're headed?

We think it's a little bit of both.

Simply put, the Griffin Survivor Case is the most protective case we've ever built.

Tested and certified to meet or exceed US Department of Defense Standard 810F, Griffin's Survivor Military-Duty Case is designed from the inside out to protect your iPad from extreme conditions ... dirt, sand, rain, shock, vibration and a host of other environmental factors.

Survivor is built on a shatter-resistant polycarbonate frame clad in rugged, shock absorbing silicone. A built-in screen protector seals your Multi-Touch display from the outside environment, while hinged plugs seal the dock connector, camera lens, headphone port, hold switch and volume controls. The included stand clips on, then folds open for landscape viewing and typing.

Survivor is independently tested and verified to meet or exceed environmental testing standards for blown rain, blown dust and grit, vibration, shock, temperature and humidity. You can view videos and test results online at www.griffintechnology.com/armored.
