Provide a brief description of the technology requested*:

Equipment needed for iPad tripod for propping and stabilizing iPads during video recording, facetime/skype, and administration of video modeling interventions.

Briefly describe how the technology will be used (function)*:

Students are expected in many classes to record test administrations and consultation/counseling scenarios. Tripods will help to both improve visibility and safely stabilize the iPads used for these recordings. Further students have the ability to use iPads to administer video modeling interventions, tripods will allow for better application of the interventions.

Provide a rationale that Tech Fee funds are appropriate for this request*:

iPad tripods will be used to increase functionality of previously purchased iPads. The tripods will also decrease likelihood of damage due to unstable propping.

*Keep in mind that the committee members come from a variety of educational backgrounds and may not be familiar with department specific language. Please use concise, common terminology so that committee members reviewing this form will be able to fully understand the request.

- If you are submitting a request for computers, printers, scanners or software, you <u>must</u> consult with College Computing and the technology staff, to acquire a quote and to make sure that this equipment/software is supported by UT and compatible with existing technology.
