Provide a brief description of the technology requested:
 This request is to put in place the Echo360. This a lecture capture system on a mobile cart to be used in the field and classroom.

Briefly describe how the technology will be used (function)*: This recording equipment will allow lectures to capture live video and upload to Blackboard for student play back. Furthermore, this equipment maybe used for outdoor classes and demonstration.

Provide a rationale that Tech Fee funds are appropriate for this request*:

The Echo360 technology system is a valuable learning tool for students outside the classroom. This system allows students to gain access to lecture captures at any time, helping accommodate many students' different learning styles. There are several advantages of having this in the classroom (in addition to faculty offices): students can review lectures they attended, clarifying what is in their notes or re-listening to concepts they didn't catch the first time around.. In either case, students can review lectures when studying to reinforce concepts. Therefore, this makes the classroom environment more accessible and beneficial to the students..

***Keep in mind that the committee members come from a variety of educational backgrounds and may not be familiar with department specific language. Please use concise, common terminology so that committee members reviewing this form will be able to fully understand the request.**

- If you are submitting a request for computers, printers, scanners or software, you must consult with College Computing and the technology staff, to acquire a quote and to make sure that this equipment/software is supported by UT and compatible with existing technology.
