Provide a brief description of the technology requested*:

These are airway trainers that are also full body manikins, so we can use them to practice intubation as well as other therapies (such as CPR) and care in our Neo/Peds labs.

Briefly describe how the technology will be used (function)*:

These are manikins that the respiratory students will use to practice procedures on prior to attending full simulations in the sim lab and patient care in the hospitals. They will be utilized throughout the entire academic year in various lab sections, but most heavily utilized for the RCBS 4150 course.

Provide a rationale that Tech Fee funds are appropriate for this request*:

Our neonatal and pediatric lab equipment needs updating. Currently, we have a few intubation heads (without bodies) that are falling apart. We have a few manikins that do not have an airway that can be intubated, which are also falling apart. It is incredibly frustrating for students to pay so much money in tuition & fees only for the lungs to fall out of the intubation head as they are trying to place an endotracheal tube.

***Keep in mind that the committee members come from a variety of educational backgrounds and may not be familiar with department specific language. Please use concise, common terminology so that committee members reviewing this form will be able to fully understand the request.**

- If you are submitting a request for computers, printers, scanners or software, you must consult with College Computing and the technology staff, to acquire a quote and to make sure that this equipment/software is supported by UT and compatible with existing technology.
