The Paralegal Studies Program is offered for paralegal education and provides course work and practical experiences designed to develop the knowledge and communication skills necessary for contribution to the legal profession. Paralegals may not provide legal services directly to the public except as permitted by law.

Students must take at least 9 semester credits of Legal Specialty courses through synchronous delivery (i.e. either through traditional classroom instruction or interactive video technology instruction).

UT's Associate of Applied Science degree provides an excellent first step for those planning to obtain a bachelor degree. The two-year Associate degree provides for a seamless "2+2" transition into the Bachelor of Science in Paralegal Studies.
