SCHOOL OF INTERVENTION 
AND WELLNESS

Master of Arts in Counselor Education

The counselor education program prepares students to work in clinical mental health, chemical dependency or school counseling settings. Two accredited M.A. tracks are offered in clinical mental health and school counseling.

Clinical Mental Health Counseling

The master of arts degree in clinical mental health counseling is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP) and meets the educational requirements for licensure as a professional counselor in all states, as well as professional clinical counselor in Ohio. Graduates work as licensed counselors in community agencies, hospitals and clinics, government agencies and private practices. The master’s degree consists of 60 semester hours, including 700 clock hours of supervised field experience.

School Counseling

The Master of Arts degree in school counseling is accredited by CACREP and consists of 60 semester hours, including a clinical practicum and an internship conducted in the schools. The degree meets the educational requirements for licensure or certification as a school counselor in all states. Graduates work in elementary, middle/junior and high schools. The master’s degree consists of 60 semester hours, including 700 clock hours of supervised field experience.

Master of Arts in Speech-Language Pathology

A speech-language pathologist evaluates, diagnoses and treats speech, swallowing, language and cognitive impairments resulting from acquired, neurological and developmental disorders. The Master of Arts in Speech-Language Pathology Program is accredited by the American Speech-Language-Hearing Association. Coursework is paired with experiential learning at UToledo’s Speech-Language-Hearing Clinic, as well as off-campus externship sites to create well-formed clinicians rooted in evidenced-based therapeutic interventions. Innovative academic and clinical programming provides unique experiences that meet certification and licensure requirements.

Master of Arts/Education Specialist Degree in School Psychology

School psychologists collaborate with educators, parents and other professionals to create safe, healthy and supportive learning environments that strengthen connections between home, school and the community. The school psychology program is approved by the National Association of School Psychologists (NASP) and leads to both master of arts and education specialist degrees. It consists of three years of full-time study, approximately 76 graduate semester hours of course work, a two-semester practicum experience during the second year and a nine month, full-time, paid, supervised internship in a school setting, which is completed during the third year.

Doctorate in Counselor Education (Ph.D.)

The doctorate degree in counselor education is accredited by CACREP and produces leaders in the counseling field. Graduates work as counselor educators in colleges and universities, as supervisors and administrators, and as licensed counselors. The degree consists of 60 semester hours beyond the master’s degree in counseling and includes comprehensive examinations and dissertation research.

Madeline Clark, Ph.D., LPC(VA), NCC, ACS
419.530.4775  |  madeline.clark@utoledo.edu
Master of Athletic Training

Through the use of high-impact teaching practices, students gain the professional knowledge and skills necessary to work in collaboration with physicians and other healthcare professionals to provide preventative and acute care, and evaluate and treat injuries and illnesses in a physically active population. The MAT program prepares students for certification and licensure to practice as an athletic trainer.

Three Program Components

- Classroom- and lab-based courses where you will focus on developing professional knowledge and skills
- 40+ weeks of clinical education
- Opportunity to develop and hone skills in accessing, implementing and contributing to sports medicine research.

Occupational Therapy Doctorate

Occupational Therapists work with clients across the lifespan in healthcare, education, and community settings to promote engagement in everyday activities (called “occupations”). They identify and reduce barriers to participation in occupations including physical, cognitive, psychological, social, and environmental factors. They believe that engaging in occupations promotes self-identity, health and wellness. In our doctoral-level program, students develop skills in practice, advocacy, and research through coursework, a scholarly project, and fieldwork, culminating in an individually designed semester-long capstone. Graduates are prepared to be leaders in the field.

Doctor of Philosophy in Exercise Science

The doctoral program provides advanced study through a variety of courses, seminars and independent research experiences. You’ll work closely with a faculty mentor and advisory committee to design a unique educational and research program to meet your needs. Students generally plan on careers in higher education academics, research or leadership positions in their specific areas of expertise.

Doctor of Physical Therapy

Physical therapists evaluate and treat individuals with physical impairments and other health-related conditions that limit their ability to move and perform functional activities. Academic coursework and clinical education emphasize interprofessional education and collaborative practice, as well as physical therapy examination and evidence-based therapeutic interventions. The program prepares you for licensure to practice as influential clinicians in an ever-changing healthcare delivery system.

Master of Science in Occupational Health-Industrial Hygiene

Industrial hygiene professionals are involved in evaluating and controlling exposures to hazards that can cause injury or illness to people at work or in the community. The curriculum prepares and qualifies graduates for entry- and upper-level positions as occupational health and safety specialists at governmental agencies, manufacturing and service industries, consulting firms, healthcare organizations and academic institutions. The industrial hygiene program is accredited through the Applied and Natural Science Accreditation Commission of ABET.
