

## Research Databases from EBSCOhost

Several of the [Research Databases](#) available from OhioLINK are provided by the EBSCO company and use the same method of searching. This guide will show you the basic features common to all of these databases. A list of databases that this guide applies to can be found on the last page.

### EBSCO Basic Search Screen (Academic Search Complete)

The screenshot shows the EBSCO Basic Search interface. At the top, there is a navigation bar with links for 'New Search', 'Publications', 'Subject Terms', 'Cited References', and 'More'. On the right, there are links for 'Sign In', 'Folder', 'Preferences', 'New Features!', 'Ask a Librarian', and 'Help'. The main search area includes the EBSCO logo, the text 'Searching: Academic Search Complete', and a 'Choose Databases' link. A search input box is followed by 'Search' and 'Clear' buttons. Below the search box are links for 'Search Options', 'Basic Search', and 'Advanced Search'. Three callout boxes provide instructions: one points to the 'Database Name' text, another points to the 'Choose Databases' link with the text 'Click to select additional databases to search at the same time.', and a third points to the 'Advanced Search' link with the text 'Click to go to the Advanced Search screen with more options for searching and refining your results.'

### EBSCO Advanced Search Screen (Academic Search Complete)

The screenshot shows the EBSCO Advanced Search interface. It features the EBSCO logo, the text 'Searching: Academic Search Complete', and a 'Choose Databases' link. The search area consists of three rows, each with an input box, an 'AND' dropdown menu, and a 'Select a Field (optional)' dropdown menu. The first row has a 'Search' and 'Clear' button. Below the search area are links for 'Basic Search', 'Advanced Search', 'Visual Search', and 'Search History'. The EBSCO logo is also present in the top left corner.

#### SEARCHING:

Enter the subject to be searched in the search box as keywords or phrases that describe your topic, then click Search. Keywords can be combined with 'AND,' 'OR,' or 'NOT' to control how the words are searched. Placing AND between words will require that both words are in all results. An OR between words means that either word will be in the results, but not necessarily both of them. Two or more words next to one another are searched as a phrase and will be found near each other in all results. If you want to search for an exact phrase (two words directly next to each other), place the "words in quotation marks". You can also find multiple forms of a word using '\*' at the end (comput\* will retrieve all articles including the words compute, computer, computing, etc.) or replace a single letter within a word with '?' (ne?t will find nest, next, neat, etc.). The database will automatically find both singular and plural forms of a word when searching.

In order to search by **subject heading, journal name, article title, etc.**, go to the Advanced Search. Choose the type of search you want to search each word or phrase by using the "Select a Field" drop down. Choosing TX All Text from this menu will allow you to search for your term appearing anywhere in the full text of an article.

#### LIMITING AND EXPANDING YOUR SEARCH RESULTS

By choosing ► Search Options from the Basic Search Screen, or beneath the search box on the Advanced Search screen, you will be able to see options for limiting or expanding your search results. Selecting any of these options will reduce the number of articles found. You can search for only articles from peer-reviewed (scholarly) publications, find only articles with full text from EBSCO (note: other full text may be available, see Find a Copy, below), limit to articles published in a specific year, month, or day, in a specific magazine or journal title, etc. To find articles of a specific number of pages, enter the number or page range.

Expanders will increase the number of articles found. If you check 'Also search within the full text of articles', the database will look for your keywords in the entire text of articles that EBSCO has full text for. 'Also search for synonyms' will search for words related to your keywords (when available). For example, a search for airplane will also search for aircraft, jet, airlines, etc.

## RESULTS LIST

The total number of results will be displayed at the left of your results lists, as well as ways of limiting or refining your results (see above for examples). To the right of the results list will be any related images, as well as a chat box to talk to a UT librarian when our Reference Desk is open.

Results are displayed 10 articles at a time, with the most relevant articles first. Relevance is determined by how often your search terms appear and how recent the article is. Only a brief citation is shown for each article, along with links to any full text from EBSCO and the Find a Copy link. (To change the display format, order or number, click on Page Options directly above your search results.) Several forms of full text may be available (HTML, PDF, etc.) and clicking on Find It! will check with OhioLINK for other forms of full text or to see if a printed copy of the article is available in UT's libraries.

Clicking on the article title will bring up more information about the article, including an abstract (summary) and subject headings. If there is HTML full text available, it will display after the citation. To see other full text formats, click on the Full Text link.

To see more results than the 10 shown on your screen, click on the number of the page of results you want to jump to, or click 'Next'.

### Sample Results List

The screenshot shows the EBSCO Academic Search Complete interface. At the top, the search term 'sumo wrestling' is entered in the search box, with 'Search' and 'Clear' buttons. Below the search box are links for 'Basic Search', 'Advanced Search', 'Visual Search', and 'Search History'. The search results are displayed on 'Page 1' of 5, with 'Next' and 'Relevance Sort' options. The results list contains two entries:

- Cleaning Up Sumo.**  
By: Beech, Hannah; Sekiguchi, Toko. *Time*, 8/23/2010, Vol. 176 Issue 8, p30-33, 4p, 5 Black and White Photographs; (AN 52896044)  
Subjects: SUMO; TRAINING; SPORTS -- Sociological aspects; SPORTS -- Psychological aspects; WRESTLERS; SHINTO -- Customs & practices; JAPAN; Other Spectator Sports; JAPAN -- Social life & customs -- 1945-  
Database: Academic Search Complete  
Add to folder | Relevancy: ██████████  
HTML Full Text  
Find It! Find It!
- Cervical Spinal Cord Injury in Sumo Wrestling.**  
By: Nakagawa, Yasuaki; Minami, Kazufumi; Arai, Tatsuya; Okamura, Yoshihisa; Nakamura, Takashi. *American Journal of Sports Medicine*, Jun2004, Vol. 32 Issue 4, p1054-1058, 5p; DOI: 10.1177/0363546503258773; (AN 13500014)  
Subjects: SPINAL cord; WOUNDS & injuries; WRESTLING; SUMO; CASE studies; CERVICAL vertebrae -- Wounds & injuries; JAPAN  
Database: Academic Search Complete  
Remove from folder | Relevancy: ██████████ | Cited References: (17)  
Find It! Find It!

On the left side, there are filters for 'Refine your results' (EBSCO Full Text Only, References Available, Scholarly (Peer Reviewed) Journals) and 'Source Types' (All Results, Academic Journals, Magazines, Newspapers, Book Reviews). On the right side, there are sections for 'Folder has items' (Cervical Spinal Cord Inju...), 'Related Images', 'Chat with a Librarian', and 'Get help here' (utoledolibraries is online).

## PRINTING, E-MAILING, AND SAVING USING THE FOLDER

When you are looking at the record for an article, you can Print, E-mail, or Save that article individually. You can also print, e-mail, or save multiple articles by adding them to your folder. Click on the Add to Folder in your results list or on an individual record. The 'Folder has items' at the right of your results will show you the total number of items in the folder currently. To retrieve the items you placed in the folder, click on Go to: Folder View. At this point you will have the opportunity to print, email, or save the documents to a disk. When printing or saving to disk, you only have the option of including the HTML full text of the document. E-mail gives you the option to include the HTML full-text, as well as sending the PDF full text as a separate message.

## SEARCH HISTORY

Your search history is a list of all of the searches you have already conducted during the current session, along with the number of results each had. Click on ‘View Results’ to see the results of a previous search, or on ‘Edit’ to return to a search and modify it (by adding more keywords or selecting new limiters). You can combine searches using AND, OR, and NOT, just like you combine keywords in your search box. In the example below, typing S1 AND S2 in the Find: box is the same as typing ‘sumo wrestling AND diabetes’ in the Find: box.

You can print out your search history for future reference, or delete individual searches from the history. You can save and retrieve search histories if you want to use them in future database sessions; this requires you to register for a free myEBSCOhost account. This will also let you have EBSCO run searches and have the results sent to you by e-mail on a regular basis.

### Sample Search History Screen

Search History/Alerts				
<a href="#">Print Search History</a>   <a href="#">Retrieve Searches</a>   <a href="#">Retrieve Alerts</a>   <a href="#">Save Searches / Alerts</a>

<input checked="" type="checkbox"/> S1	sumo wrestling	Search modes - Boolean/Phrase	<a href="#">View Results</a> (134)	<a href="#">View Details</a> <a href="#">Edit</a>

## CHANGING DATABASES AND MULTIDATABASE SEARCHING

There are more than 60 databases provided by EBSCO. Click the **Choose Database** tab at the very top of the screen to choose another database or search multiple databases in the EBSCO service. You will see a listing of all of the OhioLINK databases that can be searched using EBSCO’s software, along with brief descriptions of their content and a list of journal and magazine titles included in each database.

To search a single database, click on the name of the database itself. To search multiple databases simultaneously, click the check boxes next to the database names and then click ‘Continue’. Duplicate results from multiple database searching are removed. Please note, the greater the number of databases selected, the slower the service will be and you may not have all of the limiters available to you in individual databases.

### Academic (College & University) Databases

Academic Search Complete	Gender Studies Database	Mental Measurements Yearbook
Agricola	GreenFILE	MLA Directory of Periodicals
Alt Health Watch	Health and Psychosocial Instruments	MLA International Bibliography
America: History and Life	Health Source - Consumer Edition	Music Index
ATLA Religion Database	Health Source: Nursing/Academic Edition	Newspaper Source
Bibliography of Native North Americans	Historical Abstracts	Philosopher's Index
Business Source Complete	Humanities International Complete	Psychology and Behavioral Sciences Collection
CINAHL Plus with Full Text	Insurance Periodicals Index	Regional Business News
Communication & Mass Media Complete	International Bibliography of Theatre & Dance w/ Full Text	Religion and Philosophy Collection
Computer Source	International Political Science Abstracts	RILM Abstracts of Music Literature
Computers & Applied Sciences Complete	Legal Collection	Social Work Abstracts
Criminal Justice Abstracts	Lexi-PALS Drug Guide	SocINDEX with Full Text
EconLit	LGBT Life with Full Text	Sociological Collection
Economia y Negocios (Spanish)	Library, Information Science & Technology Abstracts	SPORTDiscus with Full Text
Education Research Complete	Literary Reference Center	Tests in Print
ERIC	MedicLatina	Vente et Gestion (French)
Film & Television Literature Index with Full Text	MEDLINE with Full Text	Women's Studies International
Fuente Academia (Spanish)		
Garden, Landscape & Horticulture Index		

### Databases Primarily for School Age Students

Funk & Wagnalls New World	MasterFILE Premier	TOPICsearch
Encyclopedia	Middle Search Plus	Vocational and Career Collection
MAS Ultra - School Edition	Primary Search
