

**Introducing**  
**The Enhanced Academic Manager®**  
**and**  
**Updated Exam Master OnLine®**  
  
***Advanced Online Testing For Educators***  
***Advanced Study and Testing System for Students***

**Academic Manager®** is a re-engineered, updated version of our powerful online exam delivery system. It encompasses all of the same features as the current system, and adds many enhancements and improvements, offers a more intuitive user interface, and is built on a more modern web development framework.

**Academic Manager®** has been re-engineered using the latest in web development and database technologies. Academic Manager® offers robust performance under all conditions, and provides the benefits and features developed from years of faculty use. Additionally, a number of new features and enhancements have been added to help faculty better manage content while offering more flexibility in exam assignments and management.

**Exam Master OnLine®** builds on the significant update to the user interface accomplished in 2010-2011, and adds more flexibility for exam creation and other features to help users get the most out of their study and review time.

**New Features of Academic Manager®**

**System Management** – Exam Master now offers clients better tools to manage Exam Master OnLine and Academic Manager and tailor them to their institution's requirements. These include:

- Better portal management designed to help librarians and administrators coordinate access to Exam Master OnLine and Academic Manager across multiple departments, programs, or colleges
- More succinct URL addresses for easier recall by end users
- In-system messaging for convenient communication to users or colleagues
- Ability to manage users and passwords when needed
- Customizable time-zone settings
- Dashboard added for easier organization

**Collaboration and Sharing** – The new Academic Manager now makes it much easier for faculty to work together and benefit from shared access to exams, classes and reports by means of the following:

- Creation of faculty groups for shared access to content
- Custom faculty level roles to help organize and manage access
- Ability to create shared content outlines and taxonomies

**Content Management** – Academic Manager makes it easier for faculty to organize, classify and manage their own test items:

- Upgraded tools for coding and classifying questions for better exams and reporting
- Faculty can create a shared outline for their portal/program
- Alternate Question Types now available
- Greatly enhanced search

**New Assessment Features** - The heart of Academic Manager is the ability it provides faculty to create, administer and score exams. New features include:

- Unlimited exam question counts
- Question and answer Jumbling
- Ability to create exams from Multiple outlines
- Exam Session Tracking
- Rekeyed questions will show in Study Mode
- Cross Platform Security
- Exportable to XML format
- More Accessible Exam Statistics

#### **New Features of Exam Master OnLine®**

- Internal Messaging available to all users on same portal
- Ability to create exams/studies from multiple subject outlines
- Ability to create exams/studies from incorrectly answered questions
